COLLEGE CALENDAR,

1906.

Sept.	4-5.	Examinations for admission begin Tuesday at 9 a. m.
Sept.	6.	Regular college exercises begin Thursday at 10 a. m.
Oct.	10.	Stated meeting of Trustees.
Dec.	21.	First term ends Friday night.

WINTER VACATION.

1907.

Jan.	8.	Registration day. Second term begins Tuesday.
Jan.	9.	Stated meeting of the Trustees.
March	15.	Second term ends Friday night.

SPRING VACATION.

March	26.	Registration day. Third term begins Tuesday.
April	10.	Stated meeting of Trustees.
May	28.	Senior examinations completed, 4 p. m.
June	2.	Baccalaureate sermon, Sunday at 10.45 a. m.
June	3.	Prize Drill, 8 p. m., in the Armory.
June	4.	Class Day. Stated meeting of Trustees. Glee Club concert at 8 p. m. in Thompson Hall.
June	5.	Commencement Day, Wednesday.

SUMMER VACATION.

Sept. 3-4. Examinations for admission begin Tuesday at 9 a. m.
Sept. 4. Registration day. First term begins Wednesday.
Oct. 9. Stated meeting of Trustees.
Dec. 20. First term ends Friday night.

WINTER VACATION.

1908.
Jan. 7. Registration day. Second term begins Tuesday.

BOARD OF TRUSTEES.

His Excellency, Gov. JOHN McLANE, M. S., *ex officio.*
CHARLES W. STONE, A. M., East Andover, *President.*
Pres. WILLIAM D. GIBBS, Durham, *ex officio.*
Hon. LUCIEN THOMPSON, Durham, *Secretary.*
Hon. JOHN G. TALLANT, Pembroke.
*GEORGE B. WILLIAMS, Walpole.
Hon. WARREN BROWN, Hampton Falls.
Hon. ROSECRANS W. PILLSBURY, Londonderry.
Hon. RICHARD M. SCAMMON, Stratham.
WALTER DREW, Colebrook.
Hon. NAHUM J. BACHELDER, M. S., A. M., East Andover.
GORDON WOODBURY, A. B., Ph. D., LL. B., Bedford.
EDWARD H. WASON, B. S., Nashua, *Alumni Trustee.*
GEORGE W. CURRIER, M. D., Nashua.
WALTER M. PARKER, A. B., Manchester, *Treasurer.*

*Died August 19th, 1906.

OFFICERS OF INSTRUCTION.

WILLIAM D. GIBBS, M. S., *President and Director of the Experiment Station.*

CHARLES H. PETTEE, A. M., C. E., *Dean and Professor of Mathematics and Civil Engineering.*

CLARENCE W. SCOTT, A. M., *Professor of History and Political Economy; Librarian.*

FRED W. MORSE, M. S., *Professor of Organic Chemistry.*

CHARLES L. PARSONS, B. S., *Professor of Inorganic Chemistry.*

*FRANK WILLIAM RANE, B. Agr., M. S., *Professor of Horticulture and Forestry.*

CARLETON A. READ, S. B., *Professor of Mechanical Engineering.*

FREDERICK W. TAYLOR, B. Sc. (Agr.), *Professor of Agriculture.*

E. DWIGHT SANDERSON, B. S., *Professor of Zoology and Entomology.*

ARTHUR F. NESBIT, S. B., A. M., *Professor of Physics and Electrical Engineering.*

WILLIAM E. HUNT, B. S., First Lieutenant Eighth U. S. Infantry, *Professor of Military Science and Tactics.*

**HARRY F. HALL, B. S., *Professor of Horticulture.*

RICHARD WHORISKEY, JR., A. B., *Associate Professor of Modern Languages.*

CHARLES BROOKS, A. M., *Associate Professor of Botany.*

---

* Resigned October 1, 1906.

** Beginning January 1, 1907.

F. W. PUTNAM, B. S., *Associate Professor of Drawing and Design.*

EDWARD L. SHAW, B. Sc. (Agr.), *Assistant Professor of Agriculture.*

EDWARD H. HANCOCK, B. S., *Assistant Professor of Mechanical Engineering.*

C. H. HARRISON, A. B., B. D., *Assistant Professor of English and Philosophy, Secretary of the Faculty.*

†IVAN C. WELD, *Instructor in Dairying.*

CHARLES JAMES, A. I. C., *Instructor in Chemistry.*

FRANK R. BROWN, B. S., *Instructor in Machine Work.*

SAMUEL T. ADAMS, B. S., *Instructor in Physics and Electrical Engineering.*

J. K. SHAW, B. Sc. (Agr.), *Instructor in Horticulture.*

FRANK A. TINKHAM, B. S., *Assistant in Dairying.*

T. J. HEADLEE, A. M., PH. D., *Assistant in Entomology.*

JOHN D. CLARK, B. S., *Student Assistant in Chemistry.*

GEORGE S. HAM, *Farm Foreman.*

MABEL E. TOWNSEND, A. B., *Associate Librarian; Registrar.*

EXECUTIVE OFFICE.

EDITH M. DAVIS, *Purchasing Agent.*

ALICE G. BAKER, *Bookkeeper.*

ENGINEER AND CURATOR OF BUILDINGS.

OSCAR W. STRAW.

† Resigned October 15, 1906.

AGRICULTURAL EXPERIMENT STATION.

BOARD OF CONTROL.

Hon. JOHN G. TALLANT, *Chairman,*	Pembroke
CHARLES W. STONE, A. M., *Secretary,*	East Andover
Hon. WARREN BROWN,	Hampton Falls
Hon. N. J. BACHELDER, A. M., M. S.,	East Andover
Pres. WILLIAM D. GIBBS, *ex officio,*	Durham

STATION COUNCIL.

WILLIAM D. GIBBS, M. S., *Director.*
FRED W. MORSE, M. S., *Chemist and Vice-Director.*
*FRANK WILLIAM RANE, B. Ag., M. S., *Horticulturist.*
FREDERICK W. TAYLOR, B. Sc. (Agr.), *Agriculturist.*
E. DWIGHT SANDERSON, B. S., *Entomologist.*
†IVAN C. WELD, *Dairy Manufactures.*
EDWARD L. SHAW, B. Sc. (Agr.), *Associate Agriculturist.*
CHARLES BROOKS, A. M., *Associate Botanist.*
J. K. SHAW, B. Sc. (Agr.), *Associate Horticulturist.*
B. E. CURRY, M. S., *Associate Chemist.*
T. J. HEADLEE, A. M., Ph. D., *Assistant Entomologist.*
GEORGE S. HAM, *Farm Foreman.*
EDITH M. DAVIS, *Purchasing Agent.*
MABEL H. MEHAFFY, *Stenographer.*
ALICE G. BAKER, *Bookkeeper.*

* Resigned October 1, 1906.
† Resigned October 15, 1906.

STUDENTS.

a—Agricultural Course; *c*—Course in Technical Chemistry; *g*—General Course; *m e*—Mechanical Engineering; *e e*—Electrical Engineering; *u*—Unclassified. Sophomores in the Engineering Courses are designated by *e* only. Freshmen are not classified in courses.

POST-GRADUATE.

Name.	Residence.	Room.
Clark, John Dustin	*Nashua.*	The Castle.

SENIORS.

Name.	Residence.	Room.
Batchelor, Leon Dexter *a*	*West Upton, Mass.*	Kappa Sigma House.
Berry, Philip Ray *m e*	*Alton.*	Miss Berry's.
Broggini, Andrew *e e*	*Concord.*	Kappa Sigma House.
Dodge, Carl Austin *c*	*New Boston.*	Kappa Sigma House.
Ingham, Harry Edward *m e*	*Nashua.*	Kappa Sigma House.
Lane, Frank Davis *m e*	*Manchester.*	Kappa Sigma House.
Littlefield, Ralph Albion *a*	*Portsmouth.*	Mr. G. Ham's.
Noyes, Bernard C. *a*	*Lisbon.*	Zeta House.
Powers, John Glenn *a*	*Concord.*	Kappa Sigma House.
Randall, Frank Wiggin *e e*	*Portsmouth.*	Delta Hall.
Townsend, Ellice Storrs *g*	*Lebanon.*	Miss Berry's.
Watson, Lucia Soule *g*	*Durham.*	Mr. D. Watson's.
Woodward, Arthur Jason *e e*	*Lancaster.*	Delta Hall.

JUNIORS.

Name.	Residence.	Room.
Adams, Waldo Lawrence *c*	*Townsend, Mass.*	Mrs. Sanders'.
Barton, Arthur Hosea *e e*	*Newport.*	Thompson Hall.
Batchelder, Arthur Milliken *e e*	*Suncook.*	Kappa Sigma House.
Buss, Minot Giles *e e*	*Wilton.*	Kappa Sigma House.
Carlisle, Lawrence Andrew *a*	*Exeter.*	Exeter.
Cash, James Dennis *a*	*Manchester.*	Zeta House.

Chesley, Mary Abbie *g*	*Lee.*	Lee.
Clough, Francis *e e*	*Contoocook.*	Kappa Sigma House.
Cory, Merton M. *e e*	*Nashua.*	Pettee Block.
Croghan, John Timothy *e e*	*Concord.*	Kappa Sigma House.
DeMeritt, Kathardine *g*	*Durham.*	Mr. A. DeMeritt's.
Dickey, Harold Hurst *g*	*Manchester.*	Kappa Sigma House.
Evans, Walter Woods *c*	*East Kingston.*	Delta Hall.
Farwell, Oren Lovell *a*	*Harrisville.*	Delta Hall.
French, Harry Fifield *c*	*Plymouth.*	Kappa Sigma House.
Hill, Stanley Fisk *m e*	*Nashua.*	Delta Hall.
Huse, Merritt Chase *e e*	*Concord.*	Kappa Sigma House.
Kirkpatrick, William R. *m e*	*Nashua.*	Delta Hall.
Murchie, William Ewart *e e*	*Concord.*	Kappa Sigma House.
O'Connor, John Joseph *e e*	*Portsmouth.*	Zeta House.
Page, John Caleb *g*	*Boston, Mass.*	Nesmith Hall.
Perley, George Arthur *c*	*Goffstown.*	Prof Pettee's.
Pettee, Sarah Elizabeth *g*	*Durham.*	Prof. Pettee's.
Smalley, Dean Fred *e e*	*Walpole.*	Delta Hall.
Tarbell, Carl Brown *m e*	*Milton.*	Kappa Sigma House.
Wadleigh, Ray Emery *e e*	*Hampton Falls.*	Kappa Sigma House.
Waite, George Lyman *a*	*Dunbarton.*	Zeta House.
Walker, Harold Duncan *e e*	*Kittery Point, Me.*	Zeta House.
Woodman, Francis Ward *c*	*West Derry.*	Mrs. Sanders'.

SOPHOMORES.

Name.	Residence.	Room.
Ackerman, Laurence Day *c*	*Bristol.*	The Castle.
Brown, Edna Olive *g*	*Rye Beach.*	Prof. Hancock's.
Burnham, Esther Young *g*	*Durham.*	Mr. Burnham's.
Campbell, William Smith *e*	*Litchfield.*	Pettee Block.
Chase, Carl *e*	*Webster.*	The Castle.
Cone, Charles Francis *e*	*Nashua.*	Zeta House.
Doe, Marion *g*	*Durham.*	Mr. Frank Doe's.
Ellsworth, Perry Foss *e*	*Meredith.*	Mr. Hoitt's.
Falconer, John Ironside *a*	*Milford.*	Mr. Stevens'.
Goodwin, Otis Dana *e*	*Hollis.*	Prof. Shaw's.
Hammond, Roland Bowman *e*	*Nashua.*	Zeta House.
Hardy, Harold Elwin *a*	*Hollis.*	Mr. Stevens'.
Hayes, Lawrence Corson *e*	*Milton.*	Pettee Block.
Hurlburt, Wallace Blanchard *e*	*Northfield.*	The Castle.
Jenness, Herbert Leon *e*	*Rye Beach.*	Zeta House.
Kelley, Charles William *e*	*Barnstead.*	Miss Berry's.
Kennedy, Carl Duncan *c*	*Concord.*	Pettee Block.
Kimball, Charles Fellows *c*	*Meriden.*	Miss Berry's.

Kimball, Leland Hayward *e*	*Salt Lake City, Utah.*	The Castle.
Lougee, Bernard Ayers *e*	*Pittsfield.*	Dr. Grant's.
McKone, Frank E. *e*	*Dover.*	Dover.
Matthews, Charles Doane *a*	*Portsmouth.*	Zeta House.
Merrill, Maurice David *e*	*Andover.*	Pettee Block.
Osgood, Philip Marcus *e*	*Pittsfield.*	Miss Berry's.
Parker, John Edward *a*	*Goffstown.*	Mrs. Sanders'.
Parker, William Brackett *g*	*Portsmouth.*	Kappa Sigma House.
Peaslee, Albert *e*	*Gonic.*	Mr. Burnham's.
Pike, Herbert S. *e*	*Lisbon.*	Mr. Edgerly's.
Pratt, Lester Albert *c*	*Alton Bay.*	The Castle.
Priest, James Harry *e e*	*Manchester.*	Mrs. J. Thompson's.
Quimby, Harold Wallace *e*	*Northwood Narrows.*	Mr. Hoitt's.
Richardson, Charles Sidney *e*	*Cornish Centre.*	Nesmith Hall.
Rolfe, Benjamin Henry *g*	*Concord.*	Kappa Sigma House.
Sanborn, Edson Dana *a*	*Fremont.*	Mr. Wentworth's.
Sanborn, Moses Harmon *a*	*Fremont.*	Zeta House.
Sargent, George Jackman *c*	*Concord.*	Pettee Block.
Smalley, Lee Lawrence *e*	*Walpole.*	Delta Hall.
Stevens, Ernest Morton *e*	*Andover.*	Pettee Block.
Stokes, Iva Dorothy *g*	*Epsom.*	Prof. Hancock's.
Townsend, Harry Storrs *a*	*Lebanon.*	Delta Hall.
Trickey, John Paul *c*	*Rochester.*	The Castle.
Trow, Herbert Averill *e*	*Mount Vernon.*	Pettee Block.
Tucker, James William *e*	*Concord.*	Pettee Block.
Watson, Sumner William *a*	*Rochester.*	Mr. Burnham's.
Wendell, Chester Snell *e*	*Dover.*	Mrs. Sanders'.
Wentworth, Stephen Neal *c*	*Rochester.*	Delta Hall.
Wilder, Howard Erwin *e*	*Amesbury, Mass.*	Prof. Shaw's.
Wilkins, Carroll Blaisdell *a*	*Nashua.*	Zeta House.
Wilkins, Harold Hartshorn *e*	*Amherst.*	Pettee Block.
Wood, Chester Loring *u*	*Dudley, Mass.*	Greenhouse.
Woods, Arthur Page *e*	*Bath.*	Pettee Block.

FRESHMEN.

Name.	Residence.	Room.
Anderson, David Wadsworth	*Manchester.*	Pettee Block.
Atherton, Luther Elmer	*Lebanon.*	Pettee Block.
Bell, Henry Gatie	*Durham.*	
Bills, Frank Hartwell	*Reed's Ferry.*	Mr. Hayes'.
Blake, Alfred Edward	*Nashua.*	Mr. Stevens'.
Boynton, Dalton	*Little Boar's Head.*	Pettee Block.
Bryant, Orville Frank	*Ashland.*	Mr. Schoonmaker's.
Burns, Lucian Holmes	*Milford.*	Mrs. Wiggin's.

Burroughs, Edgar Herbert	*Sanbornville.*	Mr. Sawyer's.
Burroughs, Wilbur Warren	*Sanbornville.*	Mr. Sawyer's.
Carson, Forest Guy	*Francestown.*	Mr. Ham.
Chamberlin, George H.	*Woodsville.*	Pettee Block.
Clark, Maurice Chester	*Marlboro.*	Mr. Stevens'.
Colburn, Kenneth Crosby	*Francestown.*	Mr. Ham's.
Converse, Henry Thomas	*Amherst.*	Mr. Sawyer's.
Corliss, Harry Percival	*Wolfboro.*	Mr. Schoonmaker's.

SUMMARY.

Post-Graduates	1
Seniors	13
Juniors	29
Sophomores	49
Freshmen	73
Students in Ten-Week Course	25
Students in Two-Year Course	13
Special Students	9
Total	212

FOUNDATION AND ENDOWMENT.

The New Hampshire College of Agriculture and the Mechanic Arts was incorporated by the state Legislature in 1866, under the provisions of the act of Congress, approved July 2, 1862, entitled "An act donating public lands to the several states and territories which may provide colleges for the benefit of agriculture and the mechanic arts," the grant of land having been accepted by an act of Legislature, approved July 9, 1863.

The act of 1862 provides that the income from the investment of the money realized from the sale of the lands shall be appropriated "to the endowment, support, and maintenance of at least one college where the leading object shall be, without excluding other scientific and classical studies, and including military tactics, to teach such branches of learning as are related to agriculture and the mechanic arts, * * * in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions of life."

The "Morrill Bill," which was approved August 30, 1890, and received the assent of the state by an act of Legislature, approved February 13, 1891, provides an appropriation for the more complete endowment and support of the colleges for the benefit of agriculture and the mechanic arts, established under the provisions of "the act of 1862."

The appropriation under the Morrill act is "to be applied only to instruction in agriculture, the mechanic arts, the English language, and the various branches of mathematical, physical, natural, and economic science, with special reference to their applications in the industries of life, and to the facilities for such instruction."

Under an act of Congress approved March 2, 1887, which received legislative assent August 4, 1887, was established that department of the college known as the Agricultural Experiment Station, the purpose of which was "to aid in acquiring and diffusing among the people of the United States useful and practical information on subjects connected with agriculture, and to promote scientific investigation and experiment respecting the principles and applications of agricultural science."

Benjamin Thompson, who died January 30, 1890, was a resident of Durham, and a farmer by profession. He had at heart the agricultural interests of his native state, and in the furtherance of those interests he bequeathed to it at his death his whole estate with a few minor reservations.

Mr. Thompson's final statement of the object of his bequest was as follows: "My object being mainly to promote the improvement of agriculture, though willing that the college to be established should also provide for the mechanic arts, it is my will that the institution to be established by the state * * * shall be called and designated * * * The New Hampshire College of Agriculture and the Mechanic Arts, if that shall be the wish of the state; and that in addition to the instruction to be given therein, as provided by my said will, there shall be taught only such other arts or sciences as may be necessary to enable said state to fully avail itself of said donation of lands by the government in good faith, which two branches of instruction shall be the leading objects of said institution or college."

By the provisions of the will, the income from this source will not, however, become available until 1910. This endowment will amount at that time to nearly $800,000, the annual income from which will be about $32,000.

The state Legislature accepted the Thompson bequest March 5, 1891, and on April 10th of the same year appropriated $100,000 for buildings. Approximately $50,000 was realized from the sale of property and from other sources. In 1893 an additional appropriation of $35,000 was made

by the state for completing and furnishing the buildings. Accordingly in 1893 the college was moved from its first home at Hanover to its present location at Durham.

The general government of the college is vested in a board of thirteen trustees. The governor of the state and the president of the college are trustees, *ex officio;* the alumni of the college elect one trustee; and all other trustees are appointed by the governor of the state, with the advice and consent of the council.

The college is executing the trust reposed in it by giving instruction in the various courses described in this catalogue under the prescribed heads of "agriculture" and "the mechanic arts."

The income for the current year is from the following sources: From the federal land grant of 1862, $4,800; from the federal government under the acts of 1887 and 1906, $22,000, to be applied only for use of the Agricultural Experiment station; from the same source under the act of 1890, $25,000; and from the state, $13,000; and from various other sources, about $5,000.

GENERAL INFORMATION.

New Hampshire College offers the following courses:

1. Agricultural Courses.
    a. Four-year course.
    b. Two-year course.
    c. Ten-week course.
2. Mechanical Engineering Course.
3. Electrical Engineering Course.
4. Chemical Engineering Course.
5. General Course.

The college is a part of the public school system of the state. It stands, in its agricultural, mechanical engineering, electrical engineering, technical chemistry, and general scientific courses, in the same relation to the high schools that the high schools stand to the grammar schools, and that these in turn stand to the elementary schools. In other words, it is a continuation of the grades of the public school system of the state, with special reference to the industrial pursuits, and, in the courses that are provided as described elsewhere in this catalogue, it aims to give a practical training that shall fit the student to deal with the problems of life.

TUITION.

The tuition fee is $60 per year, although numerous scholarships give free tuition to many New Hampshire students.

SCHOLARSHIPS.

Conant Scholarships.—There are twenty-five Conant scholarships, each paying $40 and tuition, $60—total, $100. These are to be assigned under the following conditions:

1. They are to be given to young men taking an agricultural course.

2. Each town in Cheshire County is entitled to one scholarship, and Jaffrey is entitled to two.

3. Scholarships not taken by students from Cheshire County, and those in excess of the number of towns, will be assigned to agricultural students, and may be divided at the discretion of the president.

Senatorial Scholarships.—There are twenty-four senatorial scholarships,—one for each senatorial district. Each scholarship is to pay tuition, $60. Senatorial scholarships not filled can be assigned to students from other localities at the discretion of the faculty; they are open to students in all courses.

Early application should be made for these scholarships. They will be reserved for those respective towns and districts until August 1 of each year, after which they may be otherwise assigned for the year.

These scholarships are given for the purpose of aiding deserving students, and will be withdrawn from those who use tobacco or intoxicating liquors, or show themselves not deserving. Janitorships, work on the farm, etc., also furnish assistance to a considerable extent.

Valentine Smith Scholarships.—Through the generosity of the late Mr. Hamilton Smith of Durham the sum of $10,000 has been given to the college to establish the Valentine Smith scholarships.

"The income thus accruing to the college shall be given to the graduate of an approved high school or academy who shall, upon examination, be judged to have the most thorough preparation for admission to the college; *provided,*

"That this income shall be paid to the student to whom it is awarded, in eight semi-annual payments, at the time appointed for the payment of term bills; and

"That if the student receiving this scholarship shall at any time prove unworthy, in the judgment of the faculty, by reason of defective scholarship or character, he shall forfeit his claim to the student most deserving; and

"That if the student receiving this sholarship shall cease to be a member of the college, the income from this fund, for the unexpired term, shall be awarded to the student most deserving in character and scholarship."

These scholarships yield $400 annually or one hundred dollars to each holder.

Competitive examinations for this scholarship will be held at the college at the time of the entrance examinations in September, and at no other time.

Grange Scholarships.—Each subordinate and Pomona grange in New Hampshire has the privilege of appointing one student annually to a free scholarship in any of the four-year or two-year courses in the college, each appointment to be good for four years if in a four years' course, and for two years if in a two years' course. Students holding these scholarships will be relieved from paying the annual tuition fee of sixty dollars, but will not be relieved from payment of incidental or other fees. Scholarships may be forfeited at any time by misconduct of the student or by his failure in a sufficient number of studies, or by his inability to meet the entrance requirements. Women may hold these scholarships on the same terms as men.

The method of appointment is entirely at the option of the grange; it may be by election, competitive examination, or otherwise. Holders of grange scholarships must be residents of New Hampshire.

PRIZES.

I. *Bailey Prize.*—Dr. C. H. Bailey, of Gardner, Mass., and E. A. Bailey, B. S., of Keene, N. H., offer a prize of ten dollars for proficiency in chemistry.

II. *Erskine Mason Memorial Prize.*—Mrs. Erskine Mason, of Stamford, Conn., has invested one hundred dollars as a memorial of her son, a member of the class of 1893, the income of which is to be given, for the present, to that member of the senior class who has made the greatest improvement during his course.

ESTIMATE OF EXPENSES.

Tuition,	Free		$60.00
Text-books,	$10.00	to	30.00
Military uniform for new students,	16.00	to	16.00
Drawing instruments and materials,	7.50	to	30.00
Fees*,	20.00	to	20.00
Room rent, including fuel,	30.00	to	50.00
Board, $3 to $3.50 per week, for thirty-five weeks,	105.00	to	122.50
Total,	$188.50		$328.50

Room rent is estimated on the supposition that two students occupy the same room or suite of rooms.

Rooms may be obtained either furnished or unfurnished. Most of the rooms are in suites, and are in buildings provided with heating apparatus and bath-rooms.

The college has no rooms for students.

For further information, address New Hampshire College, Durham, New Hampshire.

COURSES FOR WOMEN.

Women attending the college may elect any course laid down in the curriculum, subject to the conditions prescribed for all students. They may omit manual labor on the farm and in the shop, and substitute other studies.

The general course, with its electives, is specially prepared for women, and is so planned that special courses may be arranged in literature, langauges, history, philosophy, pedagogy, drawing, biology and manual training.

The courses in agriculture and chemistry afford opportunities for the study of the natural sciences, and the engineering courses offer exceptional advantages in mathematics and physics.

*Includes all charges commonly considered extras, except those for breakage and damage to college property.

POST-GRADUATE STUDY.

The college offers opportunities for post-graduate study in agriculture, biology and chemistry.

After the satisfactory completion of an appropriate amount of post-graduate work, advanced degrees will be given.

SPECIAL STUDENTS.

Special students shall be admitted only by vote of the faculty. Any person of mature years (not a candidate for a degree) may be so admitted upon presenting satisfactory evidence of his ability to complete the desired course of study.

REGISTRATION.

All undergraduate students who desire to attend the college during a term are required to register at the registrar's office on or before 4 p. m. of the first day of such term. Every former student registered after the first day of any term shall be charged for such registration a fine of one dollar for the first day and fifty cents additional for each succeeding day, to be remitted only by the president upon presentation of a substantial excuse for the delay.

ATTENDANCE.

All students are required to attend chapel exercises; all male students are required to attend military drill. Attendance upon class work is under the control of the individual instructors. Any instructor may, without faculty action, exclude from examination any student who has been absent from 20 per cent. of the exercises of any class under his charge.

TERM BILLS.

Tuition and fees are payable in advance, in two equal instalments: one on the first day of the fall term and the other on the first day of the winter term, of each year. No

student shall receive his registration card or attend classes until his term bills are paid.

ELECTION OF STUDIES.

Every student shall, on or before the Saturday before the last in each term, notify in writing the secretary of the faculty of his elections for the term following. Any student, who, having made his elections, desires to change, shall make application to the faculty in writing, with a statement in full of his reasons.

Any student who fails to fill out his elective slip on or before the date mentioned, shall pay a fine of one dollar before he can be registered for the studies of the next term, unless he has previously obtained from the secretary of the faculty a written excuse for delay. No student shall be permitted to make changes in courses elected by him after one week from the time of his registration in each term, except by vote of the faculty and the payment of one dollar.

AMOUNT OF WORK.

No student shall be permitted to carry less than sixteen or more than twenty-one credit hours per week of class-room work or its equivalent, without the consent of the faculty.

EXAMINATION ON ENTRANCE DEFICIENCIES.

Students conditioned on entrance examinations may have an opportunity to make up such deficiencies upon the three days preceding the beginning of the fall term, and upon the last Saturday of each term. A student who takes a deficiency examination upon an entrance subject, at any other time, must pay the college one dollar for each examination upon each subject.

Students who have any entrance condition outstanding at the beginning of the third year of residence at the college, or more than one at the beginning of the second year, will

not be allowed to register until such conditions have been removed.

THESIS.

A thesis upon some subject connected with the work of the course taken is required of every candidate for a degree. The subject, together with a written approval of it by the head of the department within which it lies must be submitted to the president before the fifteenth day of December preceding graduation. The completed thesis shall be submitted to the head of the department concerned not later than the second Tuesday preceding Commencement. The thesis must be completed in typewritten and bound form by the Tuesday preceding Commencement and in the hands of the department concerned. The thesis shall be typewritten or printed upon standard thesis paper 8½ by 11 inches, medium weight, neatly bound in black cloth and gilt-lettered on first cover with title, name of author, degree sought and year of graduation. This bound copy shall be approved by the faculty, filed and left with the College Librarian.

GRADUATION.

Those who complete a four years' course or its equivalent will be recommended for the degree of Bachelor of Science. No equivalent for one of the four years' course will be accepted which does not contain an average of at least 18 credit hours per term, in addition to military drill, for four years, and all of the required subjects of the first two years which are common to all of the four-year courses.

The regular work of the senior class, including the regular final examinations, is completed at 4 p. m. on the Tuesday of the week preceding Commencement; and each member of the class may receive a statement of his standing at the office of the registrar at 2 p. m. on the next day, Wednesday. All work required for graduation must be completed by 6 p. m. of the Saturday of the same week.

SUNDAY SERVICES.

Although the only church in Durham is nominally Congregational, it is attended by citizens of all denominations, and sectarian lines are never drawn. It is conveniently situated, and with its regular services, its Sunday-school, prayer-meetings and young people's meetings, it offers ample opportunity for religious observance.

SITUATION AND RAILROAD CONNECTIONS.

Durham is situated on the Western Division of the Boston and Maine Railroad, 62 miles from Boston, and about midway between Rockingham Junction and the City of Dover, being five miles from the latter place.

BUILDINGS.

THOMPSON HALL.

Thompson Hall, the main college building, has a length of 128 feet, exclusive of a *porte-cochere* 40 feet long, and a width of 93 feet in the widest part. It is built of granite and brick, and has three stories besides the basement.

The basement contains a blower-room, with apparatus for controlling the heating and ventilation of the building, geological laboratory, a lavatory, and rooms used for storage.

One-half of the first floor is devoted to the library, which is provided with a large, well-lighted reading room for papers and magazines, a reference room for special work, a librarian's room, a delivery room, and shelf space for 50,000 volumes. The remainder of the first floor is used for offices, recitation rooms for mathematics and history, and a waiting room for women.

On the second floor are more offices, the botanical and zoological laboratories, the drawing-room and recitation rooms for biology, mechanical engineering, philosophy and modern languages.

On the third floor is the large hall used as an auditorium, two society rooms, and the bell-boy's room.

The building is lighted by gas and electricity, and provided with the most approved system of heating and ventilation.

LIBRARY BUILDING.

The library building now being erected has a frontage of seventy-six feet and a depth of sixty-five feet, not including the stack extension planned to give shelving room for sixty

thousand volumes. It is a two story building with granite basement and trimmings of Indiana sandstone. This building has been made possible by the generosity of Mr. Andrew Carnegie, and by an arrangement in accordance with which the College assumes the care of the Durham libraries and adds to its building fund a sum of money which Mr. Hamilton Smith, late of Durham, provided for a public library building.

MORRILL HALL.

This building was erected in 1902 at a cost of about $30,000. It is 110 feet long and 58 feet wide, comprising four stories, including the basement. It is plain and simple in outline, and gives the impression of strength and solidity. The material is brick, laid in Flemish bond, with trimmings of the clear, almost white Suncook granite. These relieve and brighten to a certain extent the general effect of plainness and simplicity. The roof is of slate, and the construction throughout is designed to give the greatest possible security against fire. All the partition walls are of brick, and the steam for heating is taken from the boilers at the central station, near the Mechanical Building. The Johnson system of automatic temperature regulation has been installed. Adequate ventilation is secured throughout the building by means of a large fan in the basement. All the floors are of maple, except the basement, which is cement. Only the ceilings of the rooms are plastered, the side walls being of bare brick, calcimined Indian red.

A vestibule, eight feet wide, runs through the centre of the building the long way on each floor, except the fourth.

In the south end of the basement there is a room 56 by 32 feet, which is used for the exhibition of the different makes of agricultural implements and tools. The north end of the basement is fitted up for a live stock judging room. On the basement floor there is also a lavatory, provided with wash-stands and shower-bath, a bulletin mailing room, a soil-storage room, a fan and heating-room and a janitor's room.

The first floor is occupied by the department of agriculture. It contains two class-rooms—one for agronomy and one for animal industry—a soil physics laboratory with a preparation room attached, an agricultural reading-room, a stenographer's room, the farm superintendent's room, and the offices of the professor and assistant professor of agriculture.

The second floor is occupied by the horticultural department. It contains one class-room, a pomological laboratory, a forestry laboratory, a herbarium room, a horticultural reading-room and the offices of the professor and assistant in horticulture. The second floor is also provided with a refrigerator room, in which the fruits and vegetables used for laboratory work may be preserved. Both the first and second floors are provided with fireproof vaults in which important records and expensive equipment are kept.

CONANT HALL.

Conant Hall contains the laboratories and lecture-rooms for instruction in chemistry, physics, and electrical engineering. It is a substantial brick building, 92 by 70 feet, and three stories high, including the basement. It is heated by steam brought from the shops, lighted by gas and electricity and provided with a system of thorough ventilation. Water, gas, high pressure steam, hydrogen, oxygen, vacuum and blast are supplied through pipes wherever needed, and the lecture rooms in addition have switches controlling both dynamo and battery currents, and arrangements for stereopticon illustration.

The basement contains a small workshop, the battery, photometer, photographic and comparator rooms, a clock room protected by double walls against changes in temperature, an acid room and a water and gas laboratory provided with the necessary fixtures and appliances.

The first floor, with the exception of one room, is occupied by the physics department. It contains the mineralogical laboratory, which is provided with tile-covered desks and other facilities for blowpipe analysis; the junior physical

laboratory; an apparatus room; a reading and reference room for physical and electrical books and periodicals; an electrical laboratory; and the physical lecture-room, which is provided with all necessary conveniences, as before mentioned. For optical experiments the room can be darkened by means of special window-shutters, operated from one of the lecture-desks. A stone pier between the two desks makes it possible to use delicate instruments.

The second floor is given up entirely to the chemical department. It contains storerooms, an organic laboratory, a qualitative laboratory, a private laboratory, a dark room for polariscopic and spectroscopic work, a lecture-room provided with facilities as before described, a quantitative laboratory, and a room for the delicate chemical balances and most important reference works.

The laboratories are fitted up with modern accessories, and with special reference to the kind of work to be performed in each.

SHOPS.

These have been built in order to provide facilities for instruction in the working of wood and metals. The buildings are constructed on the "slow-burning" principle, with thick walls, and heavy, continuous plank floors. The rooms are all well lighted and well ventilated.

The main building is 42 by 106 feet, and two stories high, with a basement 31 by 42 feet. The basement is used as an engine room and laboratory. The largest room on the first floor is the machine shop, where there is opportunity for practice in the operation of working metals by cutting tools, both by hand-work and by machinery. On this floor a lavatory is provided. The second floor is mainly occupied by a wood-shop, in which the common branches of carpentry, joinery and pattern-making are taught. Practice is given in the use of carpenters' tools and in the care and operation of the machines of most general use in wood-working.

Joined to the main shop building and on a level with its basement is a one-story building, 40 by 100 feet, containing the boiler room, forge shop and foundry.

There are four boilers, aggregating 240 horse-power, which furnish steam to all the college buildings, wherever needed for heating or power. A brick chimney, 95 feet high, carries away the waste gases from the furnaces.

In the forge shop instruction is given in forging, welding, tempering and riveting, and in the foundry the student is taught to mold and cast from the various patterns made in the wood-shop.

THE ARMORY.

The armory is a brick building with granite trimmings. The main building is 61 x 99. It has a headhouse, on each corner of which is a tower. One tower is battlemented and is three stories high, to correspond with the headhouse roof, and has a slated peak. The headhouse, or portion of the building nearest the street is 31x46. In the basement of the main building are two bathrooms, one 16x22, containing two shower baths to be used by the faculty and visiting teams. The other bathroom on this floor, size 12x16, is for the use of the students and contains five shower baths; adjoining this is a locker room, 28x30; a drying-room, 5x15; a toilet-room, 8x12, and a room, 8x28, for gymnasium supplies. As this does not take up all the basement floor, there is a space, 37x52, reserved for a swimming pool, bowling alley, ball cage, etc., to be completed at some future time.

On the first floor of the main building is the drill hall or gymnasium, size 58x97, with a balcony in the second story, which furnishes a running track six feet wide.

On entering the building, from the street, there is an office on the right, to be devoted to the uses of the professor of military science, one for the physical culture director, and a private office in the tower. To the left of the hallway is a military lecture room.

On the second floor of the headhouse are the College Club rooms, one 20x43, and the other 10x16. These are fur-

nished with billiard and pool tables; a piano presented to the College Club by the College Alumni Association; easy chairs and window seats, all in mission style furniture.

The equipment of the gymnasium includes chest weights; dumb bells; Indian clubs; wands; bucks; horses; horizontal and parallel bars; traveling rings; ladders; punching bags; etc.

NESMITH HALL.

Nesmith Hall, a brick building two stories in height, is used for the work of the Agricultural Experiment Station. It contains offices and working rooms, a reference library, and chemical, entomological, bacteriological and botanical laboratories.

DAIRY.

The dairy building is a wooden structure of one and one-half stories, with basement. It contains six rooms equipped for manual training in milk testing, milk and cream pasteurizing, cream ripening, butter-making and the care and management of dairy machinery.

The first floor is used for receiving milk and for the separators. On this floor is also the office of the instructor and the laboratory for milk testing. The basement contains the ripening vats, churns and refrigerators, together with the engine.

BARNS.

The dairy barn is a large wooden structure, erected in 1895 at a cost of about $10,000. The main portion is 45 by 100 feet, two stories high, and with a basement in which are box stalls, calf and sheep pens, a cold storage room, root cellar, feed, dressing and milk rooms. A story and a half L 35 by 100 feet, with basement, is attached to the main structure. The first floor of the L is on a level with the basement of the main barn and contains stalls to accommodate 56 head of cattle. The basement of the L contains pig

pens, while the loft is used for the storage of feed, fertilizers and machinery. With the exception of the space occupied by a granary, a 120-ton silo and a 12-foot driveway, the upper floors of the main barn are used entirely for hay and forage, there being capacity for about 175 tons.

A second barn of old-style building is used by the agricultural department for the storage of hay, implements and wagons and for stabling the department horses.

A third barn, 25 by 60 feet, recently modeled, is used by the horticultural department for its horses and wagons and the storage of spraying machines and various garden implements.

GREENHOUSES.

The new range of greenhouses has been specially planned and built for carrying on modern and up-to-date work in greenhouse management and handicraft. There are seven distinct houses, besides a propagating hallway. Connected with the glass structure is a workroom, 20 by 30 feet, which also answers as an office for the florist, and is equipped with scales, seed-boxes and other accessories. The basement of the workroom, or potting house, is used for a boiler room and storeroom for potting soils. The attic has two good rooms, one of which is occupied by the greenhouse attendant. The whole system is heated by steam, the boiler being a Lord & Burnham Co. sectional. The houses are piped so that the temperature can be regulated for any kind of crop, and offer exceptional opportunities for experimental work. The main palm house and four of the lateral houses were built by the Lord & Burnham Co., greenhouse contractors, and are of steel superstructure. The other two, together with the passageways to the potting house, are constructed of cypress, with angle iron eaves plates and iron supports. One house is equipped for greenhouse management instruction and each student is given definite laboratory space and prescribed work. Two of the houses have

ground beds and are adapted for forcing vegetables. The remaining houses have raised beds, excepting the centre of the palm house, which has a ground bed.

These houses are lighted with electricity and offer unusual facilities for instruction and experimentation. When students have completed the required greenhouse courses, they are prepared to take positions as florists or gardeners of estates, etc.

LABORATORIES AND EQUIPMENT.

AGRONOMY.

This department is provided with a collection of dried specimens of the different forage crops; the more important varieties of corn, wheat and oats; and with a large number of lantern slides, grass charts and other illustrative material. The soil physics laboratory is equipped with soil bins, a compacting machine, chemical and torsion balances, and various kinds of physical apparatus for the study of soils, including that for the determination of specific gravity and for the making of mechanical analyses.

The agricultural museum contains many of the latest models of the different makes of farm machinery, tools and appliances, including plows, cultivators, harrows, mowers, rakes, corn binders, manure spreaders, different kinds of cattle ties and various makes of patent wire fences.

The college farm, with its 300 acres of land, has a variety of soils and soil conditions suited to the growth of nearly all the important farm crops, and thus offers excellent opportunities for practical work and demonstration in the department of agronomy.

ANIMAL INDUSTRY.

For the various courses in animal industry an extended use is made of the live stock of the college farm. The dairy herd consists of representative animals of the following breeds: Ayrshires, Guernseys, Jerseys and Shorthorns. The college owns six head of horses representing the draft type, and to become acquainted with the trotting and thoroughbred types the students are taken to various stock farms where these types can be inspected and judged.

For the study of the different breeds of sheep and swine the college flock of thoroughbred Southdowns, Dorset Horns, Shropshires and Merinos and herds of medium Yorkshires and Berkshires are used. Representatives of other breeds are rented for practical study and judging.

In the new agricultural building a large room has been fitted up for the judging of live stock, instruments for precise measurements are provided and score cards with a scale of points for each kind of animal are used.

The class-room is provided with a stereopticon lantern and a large collection of lantern slides is used to show the leading individuals of several breeds of live stock. The herd books of the several breeds are made use of in familiarizing the student with methods of tracing pedigrees and the practices of breeders' associations.

HORTICULTURE.

The facilities for instruction in the various lines of horticulture have vastly improved during the past few years. The entire second floor of Morrill Hall is given up to this department and contains offices, lecture-rooms, laboratories, herbarium room, seminary and library room, and a cold-storage room. On the basement floor this department has also in conjunction with the agricultural department a photograph room, soil and carpenter's room, and an implement room. The lecture room is fitted up with a stereopticon lantern. The pomological and vegetable gardening laboratories are of original design and offer every facility for modern work. During the fall term over 100 varieties of apples are studied by the students. Grapes and pears are received from western New York, and other fruits, apples in particular, from Pennsylvania, West Virginia, New York, Ohio, Minnesota, Oregon, various parts of New England and Canada. Large numbers of varieties of vegetables are grown in the experiment station trial grounds, and these offer exceptional opportunities for indentification and study in the laboratory for sometime after field conditions have gone by. The

orchards, gardens and grounds also offer opportunities for demonstrating the theories advocated in the lecture-room. Many varieties of different kinds of fruits are to be found in the orchards. These are young, but coming into bearing. The plum orchard has 60 varieties in bearing. Grapes, peaches, apples, cherries and small fruits are also grown at the Experiment Station. Propagation of fruits, shrubs and flowering plants is practised. A fine collection of Vilmorin charts is owned by the department. The collection of lantern slides is continually being enlarged.

COLLEGE FOREST.

A tract of 60 acres of old forest growth is owned by the college. It is located close at hand and offers ample opportunities for studying forestry. The country about Durham presents forestry conditions typical of New England, and the transplanting of trees, sowing of seeds and general questions of forestry management may here be studied in Nature's laboratory.

DAIRY.

All available space in this building is filled with various forms of cream separators, churns, testing apparatus and other dairy appliances. Steam is supplied by the large boilers at the power-house. In addition to the product of the college herd, milk is received from about 25 farms in Durham and vicinity. Through this arrangement the college is able to furnish plenty of milk for practice work and to provide for a most thorough and practical training in dairy and creamery management.

MECHANICAL ENGINEERING.

The basement and westerly rooms of the main shop building are used as engine room and mechanical laboratories and contain a 40 horse-power engine which furnishes power for the shops and electric lighting of the college buildings;

a shaft-governor, slide-valve engine; a direct acting steam pump; and a large compound duplex pump. This pump receives water under a head of 15 feet through an eight-inch pipe from a reservoir one-half mile distant, and forces it through underground mains to the various hydrants and buildings or through nozzles for measurements during tests. It is fitted with indicator motions and other necessary equipment for complete duty tests. The pump with its long supply pipe, a 10-inch standpipe and a 6,000-gallon tank, furnishes apparatus for an extensive series of hydraulic experiments.

Among other apparatus is a 50,000-pound Olsen machine with the necessary tools and measuring instruments for tension, compression and transverse tests; a 12 horse-power gas engine; a marine gas engine; a Westinghouse air-brake pump with locomotive and tender attachments; steam and gas engine indicators; a surface condenser, with a capacity of 2,000 lbs. per hour, fitted with a 5½x8x7 air pump; Bristol pyromoter reading to 2,800 degrees F.; Pitot tubes; differential gauges; cement testing machine with the necessary sieves and other apparatus for testing cement according to the recommendations of the committee for cement testing; and the usual supply of scales, gauges, thermometers and small apparatus. The three sectional boilers and the 66" return tubular boiler, with the 95 ft. brick stack are used for boiler tests and flue gas analysis, by means of the Orsat apparatus, pyrometers and thermometers reading to 1,000 F. The 66" boiler is also fitted with two forms of forced draught apparatus thus giving an opportunity for commercial tests with different grades of fuel, especially the cheaper grades. The ventilating fans and engines of the various buildings as well as the engines at the creamery, electrical laboratory and barn are available for testing. Opportunity is not only given for the student to test the engine or machine but to become familiar with its construction and operation.

In addition to the instruction given in the laboratory, excursions are made to various outside power plants, and

when practicable, tests are made, thus enabling the student to become familiar with various types of engineering practice. Each year the proprietors of a nearby mill allow the class in valve gears to take exercises in valve setting on their 50 horse-power Corliss engine.

WOOD-SHOP.

This occupies the larger part of the second story of the main building. It is supplied with benches and the necessary tools to accommodate 20 students at one time. Other equipment consists of a circular saw, board-planer, buzz-planer, jig-saw, speed-lathes, a large pattern maker's lathe with molding and boring attachments. A stock and pattern room on the same floor provides storage for lumber, patterns and unfinished work. The course in woodwork consists of practice in carpentry, joinery, cabinet-making and turning. Much of the advanced work consists of making apparatus and cabinets for use about the college. Following this work is the course in pattern-making, special attention being given to methods of design.

MACHINE SHOP.

The equipment is as follows: seven engine lathes, a 14-inch by 6-foot speed-lathe, built by students; a vertical drill, built by students; a 30-inch Flather planer; a universal milling machine with gear-cutting and spiral attachments; shaper; power hack saw; 12 benches with vises, and a large number of small tools, including micrometer, calipers and gauges necessary for accurate work. The lathes in the wood-shop were built here, and several more are in process of construction.

FORGE SHOP.

This contains 13 Sturtevant down-draft forges with anvils and necessary tools. The blast to the forges is furnished by a No. 4 blower, and the smoke carried away by a 60-inch exhauster. These are driven by a 3 by 5 vertical

engine. The student is taught the principles of forging, welding and tempering of iron and steel. Special attention is given to accuracy of dimensions as well as of shape and finish.

FOUNDRY.

The foundry is supplied with a furnace, molding benches, flasks and bench tools. Foundry work is taken in connection with the course in pattern making, and the student molds and casts from the patterns he has constructed in the wood-shop. Castings are made in iron, brass and alloy, and tests are made on "test bars" of each.

PHYSICS AND ELECTRICITY.

The physical laboratory is equipped with a good collection of the usual apparatus for laboratory work and lecture-room illustration, to which will be continually added pieces purchased or made in the college shop.

In the junior laboratory of physics there has been added apparatus for studying absorption phenomena and the comparison of spectra of films, liquids, metals, etc.; for measuring the angles of crystals and indices of refraction; for verifying the laws of refraction and total reflection of light; for determining the moment of inertia of various forms of specimens.

In electricity and magnetism the equipment includes instruments of high precision and of the latest forms, such as: a magnetometer for studying the intensity of the earth's magnetism; a universal tangent galvanometer capable of assuming a variety of forms and measuring currents from a small fraction of an ampere to one hundred amperes; a high grade, four-spool Thomson reflecting galvanometer; a Ryan electrometer for tracing pressure and current waves; a standard ballistic galvanometer; an Ayrton & Perry's variable standard of self-induction, as well as others of less accuracy for elementary work; a complete photometer equipment for comparing incandescent and arc lamps, and

the distribution of light from the latter for both open and inclosed arcs; a small, low-potential testing unit, consisting of a universal alternator belted to a direct current motor and capable of adjustment to be driven from either the direct or alternating side; a low-potential transformer, either side arranged to be connected to the universal alternator or to the secondary of the transformer on the lighting system; a bank of lamps for illustrating the various methods of distributing from mains for lighting systems, or affording loads in obtaining characteristics. deficiencies, etc.; and standard forms of voltmeters and ammeters.

For more strictly electrical engineering work, the department has the 500-light alternator used in lighting the college buildings, a direct current "exciter" dynamo, all the apparatus of a complete 55-light Edison isolated electric lighting plant, arc and incandescent lamps, and standard forms of voltmeter, ammeter and transformer.

In the dynamo laboratory the Westinghouse junior engine is capable of developing about 23-brake horse power under 100 pounds steam pressure. This engine, being on a practically independent line of steam pipe, is expected to maintain good speed regulation of the main line shaft to which it is belted and from which power is delivered to countershafts, and thence to the various dynamos and workshops of the department. This workshop is equipped with a good set of wood and metal working tools, and a 14-inch, 8-foot bed Flather engine lathe, with complete attachments; also, a small speed lathe for drilling and wood working purposes, a Union combination saw with scroll, moulding and boring attachments, and a small hand-driven metal planer.

CHEMISTRY.

The several chemical laboratories are modern in design, commodious and well equipped. Each is supplied with the latest forms of apparatus required for its particular work. Besides all necessary glass and porcelain ware, this includes water baths, drying ovens, combustion, muffle and assay

furnaces, platinum dishes and crucibles, polariscope, spectroscope, balances, lantern and other lecture appliances, etc.

ZOOLOGY.

The zoological laboratory is well supplied with aquaria, microscopes, dissecting tools, charts, reference books and collections. The latter include a representative display of the birds of New Hampshire, and a very large collection of the insects of the state arranged in glass-covered boxes. New tables have recently been added to the equipment of this laboratory.

BOTANY.

The botanical laboratory is supplied with a good herbarium, microscopes and the other necessary appliances.

SURVEYING.

The surveying instruments are sufficient in number and of the most approved pattern.

DRAWING.

At present rooms in Thompson Hall are devoted to the use of the drawing department. For free-hand model-drawing and for mathematical drawing there is a good supply of geometric models; and for free-hand industrial drawing the nucleus of a good collection exists, consisting of plaster casts of historic ornament, details of human form and antique sculpture, as well as vases and common objects. The models for machine drawing are few, but various machines in other departments are available for this work.

There is the beginning of a good working library.

MUSEUM.

The museum had for a nucleus the collections made during the state geological survey. To this additions have

been made from various sources. Many specimens are being collected to illustrate zoology, especially entomology.

LIBRARY.

The library of the college consists of about 12,000 bound volumes and 6,000 pamphlets. A large part of these are new and expensive books, making good working libraries for the different departments of instruction, including economic science and English and American literature.

Students also have the free use of the Durham public library of about 8,000 well-selected volumes.

The college supports a reading-room, which is well supplied with the leading American and foreign periodicals.

These libraries are to be placed in the new library building which will be ready for occupancy at the beginning of the next college year. See page 31.

This building is to give liberal provisions for reference and research work. While the large part of the books are to be placed in the three story stack extension, shelving room for 5,000 volumes is to be provided in the large reference room in the main building. There is also a provision for the future in the second story rooms which can be used for department libraries when the reference room proves inadequate.

FOUR-YEAR COURSES.

AGRICULTURAL COURSE.

This course is arranged especially for the general education and scientific training of students to fit them in various economic branches, such as agronomy, animal husbandry, biology, agricultural chemistry, entomology, forestry, horticulture, veterinary science, etc. Graduates are supposed to be qualified to take positions such as farm superintendents, foremen, stock raisers, dairy farmers, creamery managers, dairymen, superintendents of estates, parks or cemeteries, fruit-growers, gardeners, florists, nurserymen, landscape gardeners, foresters, poultrymen, ranchmen, etc.

It is expected that these same men will be equally prepared, depending upon individual tastes, to take positions as teachers and assistants in colleges and experiment stations.

The aim is to give a broad general foundation of pure and applied science. Laboratory methods are used in connection with lecture and recitation work. Seminary courses are also given, especially for seniors and advanced students.

BIOLOGICAL DIVISION OF THE AGRICULTURAL COURSE.

The biological division of the agricultural course is for the benefit of those students who desire to make a special study of some phase of natural history. It leads to such positions as teachers of botany and zoology in high schools and colleges, entomologists for experiment stations, state inspectors of nursery grounds, etc. During the first two years the student pursues the regular studies of the agricultural course, but in his junior year he begins to specialize in botany and zoology, a considerable proportion of his time during the rest of his course being given to these sub-

jects. Students taking this course will elect, with the advice of the instructors in charge, six hours per week of biological work in the junior year and seven hours per week during the senior year, exclusive of thesis. Two years of German required.

CHEMICAL DIVISION OF THE AGRICULTURAL COURSE.

The work of this division is especially intended to give a thorough grounding in the principles of chemistry as applied to agriculture and agricultural chemical analyses, and to train the student thoroughly in all kinds of manipulation required of the chemist in experiment stations, large dairy establishments, fertilizer works, etc.

Instruction is given mainly by personal supervision in the laboratory, accompanied by lectures, themes, recitations; and, as in the course in technical chemistry, the studies are arranged to meet the needs of the individual. Students wishing to take this course will elect, with the advice of the instructors in charge, six hours per week of chemical work during the junior year, and seven hours per week during the senior year. Two years of German will be required.

COURSE IN MECHANICAL ENGINEERING.

Mechanical engineering is concerned with the design, construction, care and operation of machinery.

The special studies are: mathematical, including a large amount of drawing; technical, pertaining directly to the professional work of the engineer; and general.

The study of the scientific principles underlying the work of the engineer is accompanied throughout the course by actual practice in mechanical operations and scientific research, by training in the use of tools for working wood and metals, and by experimental tests and demonstrations in the mechanical, chemical and physical laboratories.

ELECTRICAL ENGINEERING COURSE.

The electrical engineering course is intended to meet the demands of a young man fitting himself for practical and professional engineering, in connection with the various applications of electricity.

By means of lectures, recitations and laboratory work, the subjects of the course are brought to the attention of the student in such a manner as to emphasize not only the present needs of the practician and engineer, but to give him the groundwork that will enable him to grasp and understand the constantly increasing number of problems that require solution.

The instruction aims to impart a complete practical and theoretical knowledge of the best modern types of electrical machines and appliances and the methods of designing, building and operating them.

The rapid progress in recent years in applying electricity to commercial uses, renders it difficult, if not impossible, for one without a technical education to gain prominence and be intrusted with its more responsible positions.

COURSE IN CHEMICAL ENGINEERING.

This course is intended to fit for the career of a professional chemist or chemical engineer, and to give a good foundation for original and independent chemical research.

Instruction is imparted by lectures, recitations and a large amount of carefully supervised laboratory work. The laboratory course is largely an individual one, and the work of each student is conducted with reference not only to the particular object he may have in view, but also to the acquirement of a broad knowledge of chemical science. The student is given a thorough training in German and French, to enable him to read with ease the chemical literature; a thorough grounding in mathematics, necessary for advanced theoretical chemistry or chemical engineering; a somewhat limited amount of special engineering work, both mechanical and electrical; and a thorough undergraduate training

in theoretical and applied chemistry. He is encouraged to develop the power of solving chemical problems by independent thought through the aid of the reference works and chemical periodicals which the library contains. Owing to the fact that the laboratories are becoming overcrowded the number of students taking this course is limited to six in each class. These six are chosen in the early part of the Sophomore year from among those who have applied. Fitness to become successful chemists will alone determine the choice made.

GENERAL COURSE.

The general course in its original form was established in response to the demand that special provisions should be made for women. It has been broadened and improved by additional studies, and by an extensive scheme of elections, until in its present form it offers to either men or women "a liberal education upon a scientific basis."

MILITARY DEPARTMENT.

This department is in charge of an officer of the United States regular army, detailed by the war department, as professor of military science and tactics. Military instruction, which is required by law, is both theoretical and practical, the latter largely during the fall and spring terms, the former having special reference to the duties of the line.

The organization is a battalion of two companies, officered by cadets selected for character, soldierly bearing and efficiency. The federal government has furnished rifles and equipment for 200 men. Attention is paid to rifle practice, the government supplying ample ammunition and target materials, and the college a good range. The rolling country in the vicinity of the college furnishes the best opportunities for extended order drill and field exercises, the athletic field for close order drills and the new gymnasium and drill shed gives ample room for indoor work.

The cadets wear, whenever on military duty and may at other times provided the complete uniforms are worn, cadet gray uniforms with black trouser stripes, black braid on cuffs and collars of blouses and blue caps, army regulation. The letters N. H. C. are embroidered in gold on each side of blouse collar. The cost of such a uniform does not exceed $16 and the wearing of such does away with the necessity of purchasing a civilian suit for college use.

Service in this department is optional for members of the senior class, all other students, excepting those presenting surgeon's certificates of disability, are required to attend both drills and recitations.

Upon the graduation of each class, the names of such students as have shown special aptitude for military service are reported to the military secretary of the army and to the adjutant-general of the state. The names of the three most distinguished students in this department are inserted in the United States army register

REQUIREMENTS FOR ADMISSION TO FOUR-YEAR COURSES.

All candidates for admission to college must present satisfactory testimonials of good moral character.

Candidates for admission to the freshman class must offer studies amounting to a total of 14 units.

AGRICULTURAL COURSE.

Candidates for admission who intend to take the Agricultural Course must offer ten units from required subjects and four units from optional subjects, according to the following statement:

Required Group A		3 units
B		1 unit
C		2 units
D	(Physics and Botany)	2 units
E		2 units
		10 units
	(Optional)	4 units

GENERAL COURSE.

Candidates for admission who intend to take the General Course must offer ten units from required subjects and four units from optional subjects, according to the following statement:

Required Group A		3 units
B		2 units
C		2 units
D	(Physics)	1 unit
E		2 units
		10 units
	(Optional)	4 units
Total		14 units

ENGINEERING AND CHEMICAL COURSES.

Required Group	A		3 units
	B		1 unit
	C		3 units
	D	(Physics)	1 unit
	E		2 units
			10 units
		(Optional)	4 units
Total			14 units

GROUP A.

English.—The New England College Entrance Requirements in reading and study,—three periods a week for four years.

Reading and Practice. Each candidate will be required to present evidence of a general knowledge of the substance of the books mentioned below and to answer simple questions on the lives of their authors. The examination will usually be the writing of one or two paragraphs on each of several topics. The treatment of these topics is designed to test the power of clear and accurate expression, and will call for only a general knowledge of the substance of the books. In place of this test the candidate may present an exercise book, certified by his instructor, containing compositions or other written work done in connection with the reading of the books.

In 1907 and 1908 it will be based upon: Shakespeare's Macbeth and The Merchant of Venice; The Sir Roger de Coverley Papers in The Spectator; Irving's Life of Goldsmith; Coleridge's The Ancient Mariner; Scott's Ivanhoe and The Lady of the Lake; Tennyson's Gareth and Lynette, Lancelot and Elaine, and The Passing of Arthur; Lowell's The Vision of Sir Launfal; George Eliot's Silas Marner.

Study and Practice. This part of the examination presupposes a careful study of the works named below. The examination will be upon subject-matter, form and struc-

ture; and will also test the candidate's ability to express his knowledge with clearness and accuracy.

In 1907 and 1908 it will be based upon: Shakespeare's Julius Cæsar; Milton's L'Allegro, Il Penseroso, Comus, and Lycidas; Burke's Speech on Conciliation with America; Macaulay's Essay on Milton and Life of Johnson.

—3 units.

GROUP B.

The work offered for each unit in History must consist of at least three exercises per week during one year of the high school course. If one unit is offered it may be for either American History or Ancient History. If two or more units are offered, one unit must be for American History and one for Ancient History. In case one year has been given to American History and two years to Grecian and Roman History, either with or without other Ancient History, credit will be given for three units. For details of preparatory work in History reference is made to "A History Syllabus for Secondary Schools, by the New England History Teachers' Association." Boston, D. C. Heath & Co., 1904.

1. American History and Civics.

The History requirements are covered by Channing's Students' History, or by Hart's Essentials, with the collateral work. The work in Civics must include at least a knowledge of the Constitution of the United States.

2. Ancient History.

Wolfson's Essentials or an equivalent, with the collateral work, or, the History of Greece and the History of Rome as given in works like Myers' History of Greece, Morey's Outlines of Greek History, Allen's Roman People, Myers' Rome and Morey's Outlines of Roman History.

—1 unit.

3. English History.

The amount of English History required is represented by Gardiner's Students' History, by Larned's or Montgomery's History, or by Walker's Essentials, with the collateral work.

—1 unit.

4. Mediæval and Modern History.

Harding's Essentials of Mediæval and Modern History with the collateral work, or Myers' Mediæval and Modern History, or an equivalent.

—1 unit.

GROUP C.

Algebra through quadratic equations, including radicals and fractional and negative exponents, and Plane Geometry.

—2 units.

SOLID GEOMETRY.

The equivalent of Wells' presentation.

—1 unit.

PLANE TRIGONOMETRY.

The equivalent of Wentworth's presentation.

—1 unit.

GROUP D.

PHYSICS.

The preparation required for entrance in Physics shall be an equivalent of 75 class exercises, one hour each in length.

When certificates are offered, they should state the number of exercises and time allotted to each exercise.

—1 unit.

BOTANY.

Gray's Lessons in Botany with a herbarium of 50 plants or Coulter's Plant Relations with laboratory work or an approved equivalent.

—1 unit.

ZOOLOGY.

Davenport's Introduction or an approved equivalent.
—½ unit.

PHYSICAL GEOGRAPHY.

Davis' Elementary or an approved equivalent.
—½ unit.

GEOLOGY.

Leconte's Compend or an approved equivalent.
—½ unit.

CHEMISTRY.

Elementary Inorganic Chemistry equivalent to the work covered in Remsen's Briefer Course, Storer & Lindsay's Manual, Witham's Elements or Newell's Descriptive Chemistry, accompanied in each instance with laboratory practice.
—½ unit.

GROUP E.

It is expected that the student will give two years to the preparation of the language offered. The requirements are as follows:

In German the student will be held responsible for the conjugations of strong and weak verbs, the declensions of articles, nouns, adjectives and pronouns, the elements of syntax, the uses of the modal auxiliaries and the translation from English into German of simple connected passages based on one of the books read. More attention, however, is paid to the translation from German into idiomatic English. The student should read at least 200 pages of German prose. The following books are recommended:

1. Collar's First Year German (Ginn & Co.); Kaiser and Monteser's Brief German Course (American Book Co.); Huss, German Reader (D. C. Heath & Co.); Andersen, Märchen; Brandt, German Reader; Lange's Beginners' German Book (Allyn &

Bacon); Carruth's German Reader (Ginn & Co.); Stern's Geschichten vom Rhein (Com. Bk. Co.).

2. Hillern, Hoher als die Kirche; Riehl, Der Fluch der Schönheit; Storm, Immensee; Baumbach's Der Schwiegersohn; Gerstacker, Irrfahrten; Heine, Die Harzreise; Freytag, Aus dem Staat Friedrichs des Grossen.

—2 units.

In French the applicant is expected to be familiar with the whole subject of French grammar, and to be able to translate from English into French simple connected passages based on one of the books read. More attention, however, is paid to the translation from French into idiomatic English. The student should read at least 400 pages. The following books are recommended:

1. Fraser & Squair's French Grammar (Heath); Laboulaye, Contes Bleus (Heath); Colin, Contes et Saynetes (Ginn & Co.); Super, French Reader; Rollins, French Reader (Allyn & Bacon); Aldrich & Foster's French Reader (Ginn & Co.); Bruno's Le Tour de la France (American Book Co.).

2. Halévy, L'Abbé Constantin; Mérimée, Colomba; Erckmann-Chatrian, Le Conscrit de 1813; Dumas, La Tulipe Noire; Daudet, La Belle Nivernaise; Berthet, Le Pacte de Famine; Sand, La Mare au Diable.

—2 units.

GROUP F.

Students entering from approved schools may receive credit in their certificates for the following work in Latin or Greek.

LATIN.

Grammar and four books of Cæsar. Two years' work.

—2 units.

Virgil, six books.
Cicero, six orations.

—2 units.

GREEK.

Books I and II of Xenophon's Anabasis, Books III and IV of the Anabasis or their equivalent in other Attic prose, and 1,500 lines of Homer.

—2 units.

In place of examinations, certificates will be received from approved preparatory schools in New England. Approval of a school will be withdrawn whenever it appears that the work of the school does not reach the standard required by the college. No certificate will be accepted from a private tutor or instructor.

Certificates should meet the requirements *in full;* in case of exceptions the candidate will be examined on any requirement not covered by the certificate. If the certificate makes exceptions in more than a third of the work required for admission to any course, or if the certificate makes *any* exception in the case of a student who has not regularly graduated from an approved school, the certificate will not be accepted and the student will be examined on all the requirements.

Certificates will be accepted for that work only which has been done in the certifying school, or which is necessarily involved in the work done there; work done in the grammar school must not be certified unless reviewed in the high school.

Divided certificates from two or more schools will be accepted when the preparatory work has been done in more than one institution.

Certificate forms will be furnished upon application.

Candidates for advanced standing are also examined in the studies that have been pursued by the class which they propose to enter.

Examinations will be given, in the subjects presented for admission, on the Tuesday and Wednesday preceding the beginning of the college year. Candidates will present themselves with their credentials on the first day of the examination. See Calendar.

REQUIREMENTS FOR GRADUATION FROM FOUR-YEAR COURSES.

The degree of Bachelor of Science will be conferred upon those who complete a four years course or its equivalent.

The regular work of the senior class, including the regular final examinations, is completed at 4 p. m. on the Tuesday of the week preceding Commencement; and each member of the class may receive a statement of his standing at the office of the registrar at 2 p. m. on the next day, Wednesday. All work required for graduation must be completed by 6 p. m. of the Saturday of the same week.

Each candidate for a degree must prepare a thesis on some subject relating to the studies he has taken.

DESCRIPTION OF STUDIES.

AGRICULTURE.

The rapid development of the science of agriculture has made it necessary to divide the subject into several distinct branches or subdivisions, and to give to each of these branches a definite name. Accordingly the various agricultural studies will be found grouped under the following heads: Agronomy, or technical agriculture; Zootechny, or animal industry; Agrotechny, or dairying; Rural Engineering and Farm Economy.

AGRONOMY.

PROF. TAYLOR.

Agriculture 1. Principles of Agriculture.

Lectures and recitations upon the elementary principles of agriculture, including a study of the soil, the plant and the animal, and the relations of each to the other. The course is given to the First Year Two-Year Students only, and forms a basis for the succeeding courses.

Three exercises per week. F.

Agriculture 2. Farm Equipment.

Lectures and recitations upon the selection, planning and equipment of farms; fences and fencing material; drains and drainage; farm wells; objects, methods and implements of tillage; cattle ties, mangers, etc. Practical exercises in leveling and laying out of drains and in the preparation of plans and maps of farms. For Agricultural Juniors and Second Year Two-Year Students.

Three exercises per week. F.

Agriculture 3. Soil Physics.

Lectures and recitations upon the formation, kinds and physical properties of soils; the movements and conservation of soil moisture; the relation of heat and air to soil; the nature and physical effects of tillage and fertilizers; laboratory work and experimentation with soils to show the physical effects of different conditions and texture. For Agricultural Juniors and Second Year Two-Year students.

Three exercises per week. W.

Agriculture 4. Farm Crops.

Lectures and recitations upon the history, use, methods of culture, harvesting, storing and marketing of farm crops; practical work in judging and scoring the different varieties of grain, together with a study of growing and dried specimens of grasses, clover, rape and other forage crops. For Agricultural Juniors and Second Year Two-Year Students.

Three exercises per week. S.

Agriculture 5. Manures and Fertilizers.

The course will consist of lectures and recitations, with a brief review of the principles of plant nutrition. There will be considered in detail the constituents of farm manures and chemical fertilizers; care of manures; different methods of application, and the modifications required by different soils and crops. Elective for Agricultural Seniors; required for Second Year Two-Year Students.

Three exercises per week. W.

Agriculture 6. Origin of Soils and Soil Management.

Lectures and recitations upon the origin, distribution and classification of soils from a geological standpoint; their classification upon the basis of texture; soil maps and mapping; the improvement of soils by different methods of cultivation, drainage, rotation of crops and green-manuring; the establishment and maintenance of good tilth. Laboratory experimentation. Elective for Agricultural Seniors.

Two exercises per week. W.

ZOOTECHNY, OR ANIMAL INDUSTRY.

ASST. PROF. SHAW.

Agriculture 10. Principles of Breeding.

Lectures and recitations upon the laws of heredity, its operation under various conditions; value of selection in improving and maintaining a high standard of excellence in farm stock; variation, its extent and cause; methods of breeding, including a discussion of inbreeding, crossing and grading. Practice will be given in tracing and writing pedigrees. For Agricultural Juniors.

Three exercises per week. W.

Agriculture 11. Veterinary Elements.

Lectures and recitations upon the construction and functions of the animal body; holding a post-mortem; simple farm medicines, modes of application; care of sick animals; breeding and some of its effects; common farm operations. For Agricultural Juniors and Second Year Two-Year Students.

Four exercises per week. W.

Agriculture 12. Animal Diseases.

Lectures and recitations upon the common infectious and contagious diseases affecting farm animals; their causes and methods of treatment. This course must be preceded by Course 11. For Agricultural Juniors and Second Year Two-Year Students.

Three exercises per week S.

Agriculture 13. Stock Feeding.

Lectures and recitations upon the laws of nutrition; composition and digestibility of feeding stuffs; influence of feed on the animal body; preservation and preparation of coarse fodders, ensilage; grinding, steaming and cooking food. A study of the leading cereals and their by-products. Practice will be given in computing and compounding rations for various purposes. For Agricultural Juniors and Second Year Two-Year Students.

Four exercises per week. S.

Agriculture 14. Animal Mechanics.

Lectures and recitations upon the principles of mechanics as applied to the animal machine; the proportions and conformation

of horses for speed and for draft; modes of progression or the various gaits of the horse. Practical exercises in measuring animals and testing the value of given measurements for given purposes. Course to be given every other year, beginning with 1905. Elective for Agricultural Seniors.

Four exercises per week. F.

Agriculture 18. Animal Husbandry.

This course consists of lectures and recitations upon the different breeds of live stock; the principles of stock breeding and feeding; the care and management of stock and the raising of poultry. It is a general elementary course especially arranged for the First Year Two-Year Students.

Three exercises per week. F.

Agriculture 19. Breeds of Cattle and Sheep.

Lectures and recitations upon the origin, history, characteristics, adaptability and management of the different breeds of cattle and sheep. In the study of cattle the beef breeds are considered as to the demands of the market, and the preparation of cattle for sale and exhibition; the dairy breeds are studied from the standpoint of milk and butter production and the selection of individuals for the dairy herd.

In the study of sheep particular attention is given to their care under various conditions, the raising of early lambs and the different grades, uses and value of wool. One afternoon each week for judging the different breeds.

For Agricultural Sophomores and Second Year Two-Year Students.

Three exercises per week. F.

Agriculture 20. Breeds of Horses and Swine.

Lectures and recitations upon the origin, history, characteristics and management of the different breeds. The breeding and classification of horses for the market; training and the proper methods of harnessing and hitching. The preparation of swine for exhibition; the influence of different kinds of food upon pork production. One afternoon each week for judging and scoring.

For Agricultural Sophomores and Second Year Two-Year Students.

Three exercises per week. S.

Agriculture 21. Poultry.

This course consists of lectures and recitations upon the different classes and varieties of poultry; the subject of breeding and feeding; the location and building of poultry houses; a study of incubators and brooders; the shipping of poultry and eggs and the methods of preventing disease. Practice will be given in scoring some of the leading varieties.

Elective for Agricultural Seniors and Second Year Two-Year Students.

Two exercises per week. W.

RURAL ENGINEERING AND FARM ECONOMY.

PROF. TAYLOR.

Agriculture 15. Agricultural Seminary.

This course consists of library and reference work and a study of current agricultural literature. Each student will prepare during the term a certain number of abstracts, reports of papers upon topics relating to agriculture. For Agricultural Seniors.

Two exercises per week. F.

Agriculture 16. Rural Architecture and Farm Mechanics.

Lectures and recitations upon the principles of construction of farm buildings; barns and silos; construction and maintenance of country roads; principles of draft; farm motors and machinery. Practical work in testing and comparisons of various makes and kinds of farm machinery. For Agricultural Seniors.

Three exercises per week. S.

Agriculture 17. History of Agriculture and Rural Economics.

Lectures and recitations upon the history of agriculture from early Egyptian to modern American; present agricultural methods and systems in various countries; cost and relative profits of the different systems of farm operations in the United States. For Agricultural Seniors.

Three exercises per week. S.

BOTANY.

Asso. Prof. Brooks.

1. Introductory Botany.

A study of the general structure and the life processes of plants by means of recitations and laboratory work. For First Year Two-Year Students.

Three exercises per week. F.

2. Cryptogamic Botany.

Recitations and laboratory work on a number of lower forms of plant life. Open to First Year Two-Year Students who have completed Course 1.

Three exercises per week. W.

3. Structural Botany.

A study of structure and reproduction in the higher plants; plant societies and plant families. Recitations, lectures and laboratory work. Open to First Year Two-Year Students who have completed Course 2.

Three exercises per week. S.

4. Plant Diseases.

A study by means of lectures, recitations and laboratory work of some of the more important fungous diseases and the means of preventing their injuries. For Second Year Two-Year Students.

Three exercises per week. F.

5, 6, 7. Advanced Botany.

Three exercises per week for the senior year. Arranged to suit individual needs of those who have taken Courses 8 to 14.

8. Plant Physiology.

Lectures and laboratory studies on plant structures as related to plant activities. For Agricultural and General Freshmen.

Three exercises per week. S.

9. Cryptogamic Botany.

A study of a representative series of cryptogams, beginning with the lower and advancing to the higher forms. Special at-

tention will be given to parasitic fungi. For Agricultural and General Sophomores.

Three exercises per week. F.

10. Plant Morphology.

A continuation of the series of plant forms begun in Course 6, including a study of vascular cryptogams, gymnosperms and angiosperms. Lectures and laboratory studies. Open to students who have completed Courses 5 and 6.

Three exercises per week. W.

11. Ecology and Taxonomy.

A study of the higher plants represented in the local flora, with reference to their environment; plant societies and plant families. Lectures, laboratory and field work. Open to students who have taken Course 10.

Two exercises per week. S.

12. Mycology.

A study of representative groups of fungi, including the bacteria; culture methods and pathological work with fungous diseases. Lectures, laboratory and field work. Open to students who have completed Course 11.

Three exercises per week. F.

13. Histology.

A minute study of plant cells and plant tissues; starches, aleurones and other cell contents; use of reagents and stains; cutting and mounting of sections. Lectures and laboratory work. Open to students who have completed Course 11.

Three exercises per week. W.

14. Advanced Physiology.

Lectures and experimental work on absorption, nutrition, growth, respiration, irritability and the influences that affect them. Open to students who have completed Course 11.

Three exercises per week. S.

CHEMISTRY.

ORGANIC CHEMISTRY—PROF. MORSE.

INORGANIC CHEMISTRY—PROF PARSONS, MR. JAMES, MR. CLARK.

1. Inorganic Chemistry.

Lectures and recitations on general and theoretical chemistry, illustrated by experiments, charts, specimens, lantern views, etc. Solutions of chemical problems will be required. Required of all Freshmen.

Three exercises per week. F.

2. Inorganic Chemistry.

Course 2 is a continuation of Course 1, but the time will be mainly spent on the metallic elements, their metallurgy, salts, etc.

Open only to students who have completed Course 1.

Three exercises per week. W.

3. Organic Chemistry.

Course 3 will consist of lectures and recitations on the chemistry of the carbon compounds, together with the study of their properties. For Agricultural and Chemical Freshmen. Elective for General Freshmen.

Open only to students who have completed Courses 1 and 2.

Three exercises per week. S.

4. Qualitative Chemical Analysis.

Course 4 consists of laboratory practice, with occasional lectures. The student is expected to become proficient in the separation and detection of the common acids and bases and to keep a full set of notes. He will have practice in the writing of reactions and will fill out numerous slips containing questions bearing upon his work. For Chemical Sophomores.

Agricultural and General Sophomores, three exercises per week. F. and W.

Open only to students who have completed Course 1.

Five exercises per week. F.

5. Qualitative Chemical Analysis.

A shorter course arranged especially for Engineering Sophomores.

Open only to engineering students who have completed Course 1.

Two exercises per week. F. and W.

6. Chemistry of Plant Growth.

The composition of plants at different stages of growth and the conditions necessary for their development. This subject must be preceded by Chemistry Courses 1, 2 and 3. For Agricultural and Chemical Juniors; elective for General Juniors.

Three exercises per week. F.

7. Chemistry of Food Nutrition.

These subjects include the composition of foods and the animal body; the assimilation of the former by the latter and the principles underlying a rational diet. This subject should be preceded by Course 6. For Agricultural and Chemical Juniors; elective for General Juniors.

Two exercises per week. W.

8. Organic Reactions.

Recitations and laboratory practice on qualitative organic analysis and reactions. For Chemical Sophomores.

Open only to students who have completed Course 3.

Two exercises per week. S.

9. Organic Chemistry.

Course 9, for Juniors in the Chemical Division of the Agricultural Course, and in the Chemical Engineering Course, consists of laboratory practice by the students in preparing and purifying products relating to their respective lines of work.

Open only to students who have completed Course 3.

Two exercises per week. F.

10. Quantitative Analysis.

A preliminary course in quantitative analysis to familiarize the student with the general methods of chemical manipulation. For Chemical Sophomores. Elective in the general course in Sophomore, Junior and Senior years.

Open only to students who have completed Chemistry 4.

Seventy exercises. Number per week varies with course.

11. Advanced Quantitative Analysis.

Course 11 is arranged for students of the Chemical Courses, and is intended to fit them for work in the laboratories of agricultural experiment stations, fertilizer works, iron works, sugar refineries, etc., and for the duties of the public analyst. This course will be made to fit the end which each has in view, and will be largely an individual one. For those students in the Chemical Division of the Agricultural Course the analyses made will tend in the main toward agricultural products, fertilizers, mucks, marls, manures, dairy products, waters, foodstuffs, sugars, etc. For the student wishing to enter metallurgical works, the analyses will be in the main upon iron, steel and other metals, ores, limestones, slags, alloys, fuels, etc. As a preparation for the study of medicine, work will be done on poisons, foods, drugs, urine, etc. Other lines will be arranged to meet the wants of the individual student. Each student will be given some practice in all of the branches of agricultural, metallurgical, medical, sanitary and industrial chemistry, in order to lay a foundation for any future work which may be required of him. A short course in gas and oil analysis will also be provided. For Chemical and General students.

Open only to students who have completed Course 10.

Number and time of exercises varies with the course.

12. Chemical Journals, Methods, etc.

The work consists of the study of current chemical literature, which is mainly in the German language, with recitations once a week throughout the year. Each student will be expected to prepare abstracts, reports, criticisms, etc., upon assigned articles. For Chemical Seniors.

Open to students who have begun Course 11.

One exercise per week through the year.

13. Industrial Chemistry.

Course 13 consists of lectures on chemical manufactures, such as sugar, sodium carbonate, fertilizers, sulphuric acid, glass, matches, paints, dyes, soaps, illuminating gas, petroleum, etc. The lectures will be illustrated by lantern views; and trips to the leading New England cities, to examine important chemical manufactures, will be taken as far as practicable. For Chemical Juniors.

Open only to those who have completed Courses 1 and 2.

Two exercises per week. W.

14. Metallurgy.

Course 14 consists of lectures describing the processes employed in the smelting of the ores of iron, lead, copper, zinc, silver, gold, etc., and upon the methods used in refining these metals. The lectures are illustrated by stereopticon and by specimens of metallurgical products. For Chemical Juniors.

Open only to those who have completed Courses 1 and 2.

Two exercises per week. S.

15. Physical Chemistry, Lectures.

The work consists of advanced study of chemical theory. Practical experiments will be performed, with the aid of the student in the determination of vapor density, molecular weights, specific heat, etc.; and the study of isomorphism, diffusion of gases, solutions, ionization, electrolysis, molecular and atomic volume, thermo chemistry, equilibrium, the phase rule, etc., will take up much of the time.

Course 15 comes in alternate years with Course 13 and is open to students who have completed Courses 1, 2 and 11.

Three exercises per week. W.

16. Physical Chemistry, Lectures.

A continuation of Course 15, and is given in alternate years with Course 14.

Three exercises per week. S.

17. Agricultural Analysis.

This course is arranged especially for students of the Agricultural Course, and consists mainly of the quantitative determination of the constituents of milk, butter, fertilizers, grain, etc.

Open only to students who have completed creditably the work of Courses 1, 2, 3 and 4 or 5.

Three exercises per week through the year.

18. Metallurgical Analysis.

This course is arranged for the students of the engineering departments who may elect the same, and consists mainly of the quantitative determination of ores, slags, metals, alloys, fuels, etc.

Open only to students who have completed creditably the work of Courses 1, 2, 3 and 4 or 5.

Three exercises per week through the year.

19. Assaying. *Ten exercises.*

A course in the fire assay of gold and silver ores.
Open only to students who have taken Courses 10 or 18.

20. Thesis.

The work of the last two terms of the Chemical Engineering Course is given up to the special study of some selected subject in any branch of chemical science and the student is required to present a thesis showing him to be capable of independence of thought.

21. Chemical Research.

Especially arranged for students of the Chemical Engineering Course who are in advance of their course.

22. Elementary Applications.

An elementary course arranged for the First Year students in the Two-Year Course in Agriculture with special reference to the elements of plant food, composition of fertilizers, elements subject to exhaustion in soils, etc.

Three exercises per week. S.

DAIRYING.

MR. TINKHAM.

1. Milk and Milk Testing.

Lectures and recitations on the secretion, nature and composition of milk, its uses and value as an article of food. The causes and conditions influencing the quality of milk and the care of milk on the farm. The principles of the various tests and their application on the dairy farm and in the creamery or milk inspector's laboratory. For Agricultural Juniors, and First Year Two-Year Students.

Three exercises per week. F.

2. Dairy Bacteriology.

Lectures, recitations and demonstrations covering the more important facts in the relation of bacteria to dairying. Instruction and practice in pasteurizing milk and cream for market and for butter-making; also in making and using starters, and ripening

cream. For Agricultural Juniors and students in Ten-Week Course in Dairying.

Two exercises per week. W.

3. Dairy Machinery.

Lectures on the construction, operation and care of dairy and creamery appliances. Each student is required to take apart and assemble leading makes of cream separators and to operate them carefully and efficiently, and present a written description of each, with a record of capacity and efficiency under his management. For Agricultural Juniors and Two-Year Students.

Open to those who have completed Course 1.

Three exercises per week. S. and F.

4. Butter-making.

Text-book study, recitations and lectures are supplemented by practice in the creamery. The student is trained to perform all parts of the work and to understand thoroughly the details which make possible the production of fine butter. For Agricultural Seniors.

Open to those who have completed Courses 1 and 3.

Three exercises per week. F.

5. Cheese-making.

A course of lectures will be given covering the details of manufacture, curing and marketing of the more important kinds of cheese. The course will cover work done in European countries as well as that done in Canada and the United States. For Agricultural seniors.

Three exercises per week. W.

6. Creamery and Dairy Management.

Students are taught the method of keeping creamery and dairy accounts and will be required to present sample accounts covering various periods. Plans of dairy buildings, creameries and cheese factories are also required, with estimates for building and equipment. For Agricultural Seniors.

Open to those who have completed Courses 1-4.

Three exercises per week. S.

7. Milk and Milk Testing.

The same as Course 1. For First Year Two-Year Students.

Five exercises per week. S.

8. Practical Work.

For students in Ten-Week Course in Dairying.

Five exercises per week. W.

9. Dairy Machinery.

Lectures on the construction, operation and care of dairy and creamery appliances. For students in the Ten-Week Course in Dairying.

One exercise per week. W.

10. Butter-making.

Text-book study, recitations and lectures. For students in the Ten-Week Course in Dairying.

One exercise per week. W.

DRAWING.*

Asso. Prof. Putnam.

These courses are of an industrial nature and include both free-hand and mathematical branches of this subject.

The work of the first two terms is required of all regular students in four years' courses.

The advanced mathematical and machine drawing is prescribed for engineering courses.

The advanced free-hand drawing is elective and may be taken only by those with adequate preparation.

19. Industrial Drawing.

Free-hand lettering, free-hand drawing, use of instruments, mathematical drawing, inking, tinting, tracing and blue-prints. For all Freshmen.

Two exercises per week. F.

* Do not purchase drawing instruments or materials until you have consulted the instructor as to what is necessary. Students intending to take an engineering course should purchase high grade instruments.

20. Mechanical Drawing.

Systems of object drawing; orthographic projection; isometric drawing; mechanical perspective; shades and shadows. For all Freshmen.

Two and one-half exercises per week. W.

NOTE.—Alternating with shop-work on Wednesdays.

21. Descriptive Geometry.

Recitations and drawing exercises in the solution of geometrical problems by orthographic projection.

For Engineering Freshmen.

Three exercises per week. S.

23. Descriptive Geometry.

Continuation of 21. Practical problems on bridge beams, rafters, piping, etc.

For Engineering Sophomores.

Two exercises per week. F.

24. Elementary Machine Drawing.

For Chemical Sophomores.

Two exercises per week. F.

25. Elementary Machine Drawing.

Mechanism drawing; detail and assembly drawing of simple machines.

For Engineering Sophomores.

Two exercises per week. W.

26. Machine Drawing.

Continuation of 25.

For Engineering Sophomores.

Five exercises per week. S.

27. Machine Drawing.

Working drawings of various machines and machine tools.

For Engineering Juniors.

Two exercises per week. F.

28. Elementary Machine Design.

For Engineering Juniors.

Two exercises per week. W.

29. Steam Engine Design.

Engine details and valve-gear problems. For Engineering Juniors.

Two exercises per week. S.

30. Machine Design Drawing.

Completion of 29; the Stephenson link-motion as applied to the locomotive. 30:—The designing of boilers, shaft-couplings, pulleys, etc., having regard to the principles of Applied Mechanics and strength of materials, with complete working drawings in each case. For Mechanical Engineering Seniors who have taken Drawing 29 and Mechanical Engineering 4-6 and 8-11.

Five exercises per week. F.

31. Mill Engineering Drawing.

Figuring for strength of flooring, beams, brick and stone-work in a mill storehouse, with drawing of same. For Mechanical Engineering Seniors.

Four exercises per week. W.

32. Mill Design.

Principles and practice of cotton mill construction. Details and processes of cotton spinning and cotton machinery. The planning and laying out of a complete mill of given spindle capacity, with regard to location and number of machines, transmission and distribution of power, light, fire protection, etc.

Three exercises per week. S.

33. Free-hand Drawing.

Light and shade drawing from casts and still life; charcoal work. Elective for General Course Sophomores.

Two exercises per week. W.

34. Free-hand Drawing.

Pencil sketching from nature and exercises in perspective. Elective for General Course Sophomores.

Two exercises per week. S.

35. Architectural Drawing.

Studies of architectural detail and historic ornament.
Elective for General Course Juniors.

Three exercises per week. F.

36. Architectural Drawing.

Continuation of 35.
Elective for General Course Juniors.

Two exercises per week. W.

37. Architectural Drawing.

The design of a building, with details of ornament.
Elective for General Course Juniors.

Two exercises per week. S.

38. Architectural Drawing.

Elective for General Course Seniors.

Two exercises per week. F.

39. Architectural Drawing.

Elective for General Course Seniors.

Two exercises per week. W.

40. Architectural Drawing.

Elective for General Course Seniors.

Two exercises per week. S.

NOTE—Courses 38-40 will be given first in 1906-1907, and will correspond to the third year's work in a course of Architecture.

ELECTRICAL ENGINEERING.

PROF. NESBIT, MR. ADAMS.

Course numbers 1 to 40, inclusive, are reserved for subjects taken by Electrical Engineering Students; 41-50 for Mechanical Engineering Students; 51-60, Chemical Engineering Students; and 61-70 for Agricultural and General Course Students.

1. Direct Currents and Direct Current Dynamos.

Engineering Juniors, *three exercises per week. F.*

This course is taken up upon completion of physics 5 and begins with the study of the magnetic field produced by permanent and electro magnets, the different forms of field magnets, the physical theory of the dynamo and the calculations of the magnetic circuit. The next items are the choice of insulating materials and the copper for the coils, the consideration of armature reactions and the theory of commutation. Upon completion of the text on characteristic curves, a very thorough test is made of an Edison 3 K-W compound dynamo to determine its series—shunt and compound characteristics.

The text-book used in Courses 1 to 3 is S. P. Thompson's Dynamo Electric Machinery, Vol. 1, Direct Currents.

2. Direct Current Dynamos and Motors.

Engineering Juniors, *three exercises per week. W.*

The following subjects are taken up this term: The theory of armature winding and construction; mechanical points of design and construction; the various losses; and the design of closed coil types of dynamos.

3. Direct Current Dynamos and Motors.—A continuation of Course 2.

Electrical Engineering Juniors, first term, *three exercises per week for five weeks.* At the completion of this course the time is given to Electrical Engineering 6.

Upon completion of Course 2, a study is made of arc lighting dynamos, machines for special purposes, direct current motors and their design, regulators, controllers and the management of dynamos and motors.

4. Theoretical Electricity.

Electrical Engineering Juniors, *three exercises per week. F.*

This course begins with the study of the fundamental and derived units, the latter of which include the electrostatic, the electromagnetic and practical systems, and their conversion factors. The general theorems of the electrostatic field are developed mathematically, the laws are stated and practical application is made of them in the design of commercial apparatus.

Following this part of the subject, a study is made of magnetism and the magnetic field due to magnets, magnetic shells and circuits traversed by electric currents.

The equivalence of magnetic shells and voltaic circuits is considered with regard to its important application in galvanometers, voltmeters, etc. The theory of measuring instruments of different types is studied in detail.

A large number of examples from Hooper and Wells' "Electrical Problems" are solved as a part of Courses 4 and 5. The text used in these courses is a set of notes based upon the work of Maxwell, Mascart et Joubert, Gray, J. J. Thomson, Gerard, Entage, Nipher, Foster, Jackson and others.

5. Theoretical Electricity.

Electrical Engineering Juniors, *three exercises per week. W.*

This is a continuation of Course 4. The laws of series and parallel circuits, the laboratory methods of measuring the various electrical quantities, such as electromotive forces, resistances, capacities, permeability of iron, etc., the methods of standardizing instruments, the laws of electrolysis, etc., constitute the subjects taken up in Courses 4 and 5.

6. Theoretical Electricity Alternating Currents.

Electrical Engineering Juniors, *three exercises per week first five weeks; six exercises per week last five weeks. S.*

This course begins with the study of the properties of periodic curves, the average and virtual values of the ordinates of sine curves, followed by the development of general expressions for the instantaneous electromotive force impressed upon, and the energy spent in a series circuit, containing resistance R, self-induction L and capacity S, in terms of their components.

The phase relations of these component quantities are studied by plotting curves for a typical circuit of assumed data.

D. C. and J. P. Jackson's "Alternating Currents and Alternating Current Machinery" is the text upon which Courses 6,

7, 8 and 9 are based. Reference is also made to other standard works.

7. Theoretical Electricity.—"Alternating Currents and Alternating Current Machinery."

Electrical Engineering Seniors, *five exercises per week. F.*

Considerable time is spent in getting a correct knowledge of typical series and parallel circuits containing inductive and condenser reactances.

The solution of problems by the analytical and graphical methods, the methods of measuring inductances, power, etc., the magnetic circuit of alternators, the regulation efficiencies and losses of machines of different types receive due attention.

8. Theoretical Electricity.—"Alternating Currents and Alternating Current Machinery."

Electrical Engineering Seniors, *six exercises per week. W.*

A detailed study of the transformer is made and formulæ of design are developed, which enable its operation to be predicted under various conditions. Jackson's text is used, in addition to notes from Bedell's and Fleming's works on the transformer.

This is followed by the study of Polyphase Electric Currents and Machinery, in which S. P. Thompson's book is used in class, along with that portion of Jackson's work on the same subject.

9. Alternating Current Phenomena.

Electrical Engineering Seniors, *three exercises per week. W.*

Steinmetz's text is used in class.

10. Alternating Current Phenomena.

Electrical Engineering Seniors, *three exercises per week first five weeks. S.*

20. The Telephone.

Three exercises per week for six weeks. F.

A course of lectures and recitations on the acoustic and electrical principles of telephony, the different forms of calling and receiving apparatus and accessories, and simple circuits constitute the introduction to the course. This is followed by a consideration of the more complex forms of circuits, exchange switchboards, transfer systems and the construction of overhead and underground systems.

Kempster B. Miller's "American Telephone Practice" is used as a text.

21. The Telegraph.

Three exercises per week for six weeks. F.

The work of this course consists of a careful study of the elementary electrical principles of telegraphy, the construction and connection of lines, repeaters, high speed telegraphy, simple and multiplex telegraphy, submarine signalling, automatic devices, general electric signalling for purposes of alarms, railroads, etc., and wireless telegraphy.

The text used is Maver's "American Telegraphy."

22. Storage Batteries.

Three exercises per week the last three weeks. F.

This is a course of lectures, discussing the different types of cells, charging, discharging, their care and management, their commercial application for keeping the voltage constant at feeding centers, etc., and as sources of constant potential for laboratories.

Notes and references are used by the class.

23. Electric Lighting.

Three exercises per week for the first six weeks. W.

This course covers such subjects as general electrical distributions for series and parallel systems, the development of wiring formulæ, the calculation of size of feeders and mains, the regulation of feeder voltages, two and three wire systems, overhead and underground conductors, a detailed study of the arc and incandescent lamps, alternating current systems of distribution by transformers, etc.

Crocker's "Electric Lighting," Vol. II, is used as a text.

24. Power Distribution for Electric Railroads.

Three exercises per week for the last four weeks. W.

The chief items considered are the location of the power station as determined by economical questions, the fluctuations of load and their nature and magnitude, feeding and return systems, boosters, substations, fast and heavy railway service, alternating current motors for railroads, car equipment, controllers, safety devices, line and track construction, operation and maintenance.

In connection with this course several exercises are devoted to electricity in mining.

The text used is Bell's "Power Distribution for Electric Railroads."

25. High Tension Power Transmission.

Three exercises per week for the last five weeks. S.

The text-book used is "High Tension Power Transmission," a set of papers compiled by the American Institute of Electrical Engineers, and published by the McGraw Co., N. Y. city.

31. Electrical Laboratory.

Two exercises per week. F.

Courses 15, 16 and 17 are consecutive and consist in the measurement of resistances, inductances, the calibration of a ballistic galvanometer and Ryan electrometer, the permeabilities of samples of iron. Tests are made on a small dynamo, connected to run as a direct current series, a shunt, or a compound motor to determine the speed, torque, current, output and efficiency curves of motors. The determination of the candle power of incandesent and arc lmps, the calibration of resistances, the measurement of power in alternating current circuits, alternator characteristics, the running of synchronous motors, the load curves of a transformer, power measurement by a wattmeter and the study of polyphase machinery constitute the remainder of the course.

The laboratory manuals, upon which Courses 15, 16 and 17 are based, are Parr's "Electrical Testing in Physics and Electrical Engineering," Nichols' "Laboratory Manual in Physics and Applied Electricity," and Swenson and Frankenfield's "Testing of Electro Magnetic Machinery."

32. Electrical Laboratory.

Two exercises per week. W.

33. Electrical Laboratory.

Two exercises per week. S.

34. Thesis.

Three exercises per week. S

A deposit of fifteen dollars is made by each student electing Thesis, and where apparatus is constructed as a part of a thesis, it shall remain the property of the department.

41. The Elements of Electrical Engineering.

Courses 41 to 50 inclusive are for Mechanical Engineering Students.

Mechanical Engineering Juniors, *three exercises per week F.*

Franklin and Estey's text, "The Elements of Electrical Engineering," is used in Courses 41 to 42. These courses are similar, though briefer than 1 and 2.

42. The Elements of Electrical Engineering; a continuation of 41.

Three exercises per week. W.

43. Alternating Currents.

Three exercises per week. S.

This is a brief course taken by Juniors of the Mechanical Engineering Course upon completion of Courses 41 and 42. The text-book used is Franklin and Williamson's "Alternating Currents."

44. Alternating Currents.

Three exercises per week for the first eight weeks. F.

This is a continuation of Course 19 and is taken by Seniors of the Mechanical Engineering Course.

45. Applications of Electricity.

Three exercises per week for the last seven weeks. F.

This is a course of lectures on the telephone, telegraph, storage batteries, electric lighting and electric railroads, and power transmission, and is given to Seniors of the Mechanical Engineering Course upon completion of Courses 43 and 44. The subjects taken up in this course are more briefly treated than in Courses 20 to 24, inclusive.

51. Industrial Electricity.

Courses 51 and 52 are taken by Technical Chemistry Seniors.

Three exercises per week. F.

The principles and methods employed in electrical measurements, such as resistance of wires and batteries e. m. f. of cells, current measurement by ammeters and electrolysis, the use of the voltmeter, etc., will be carefully considered. A brief study will be made of the dynamo, motor, transformer, primary and

secondary batteries, arc and incandescent lamps and the general principles of electrical distribution.

52. Industrial Electricity.

Three exercises per week. W.

This is a continuation of Course 22. Slingo and Brooker's "Electrical Engineering" is used as a text-book in Courses 22 and 23.

61. Industrial Electricity.

Course 61 is elective for Agricultural and General Course Seniors.

Three exercises per week. F.

This course is elective for Seniors of the Agricultural and General Courses. In an elementary way, study is made of such subjects as the dynamo, motor, transformer, telephone, telegraph, storage batteries, incandescent and arc lighting, and electric railroads.

ENGLISH.

ASST. PROF. HARRISON.

*1. Rhetoric and Composition.

Two exercises per week. F.

*2. Rhetoric and Composition.

Two exercises per week. W.

*3. Rhetoric and Composition.

Two exercises per week. S.

4. English Literature.

Chaucer to Wordsworth. Lectures and readings. Special attention will be given to the theory of the drama. Open to Juniors.

Two exercises per week. W.

* Courses 1, 2 and 3, required of all Freshmen, are continuous and dependent, 2 being open to all who have passed 1, and 3 to all who have passed 2.

Theme writing, book reviews, the theory of composition and an introduction to the principles of literary criticism.

5. Wordsworth to Browning.

Text-book, lectures and readings. Special attention will be given to the work of Tennyson and Browning. Open to General and Agricultural Juniors and Chemical Seniors.

Two exercises per week. S.

7. Course in Debating.

This is intended to give the student a knowledge of the principles of argumentation and to accustom him to speaking in public.

One exercise per week. W. or S.

8. American Literature.

For Agricultural and General Seniors.

Three exercises per week. W.

9. American Literature.

A continuation of 8.

Three exercises per week. S.

10. Grammar and Elementary Composition.

For First Year Short Course Students.

Three exercises per week. F.

FORESTRY.

PROF. HALL.
MR. J. K. SHAW.

1. Arboriculture and Forestry.

This course is intended to give the student a knowledge of the various methods of forestry management in Europe and America. The text and lectures will cover the use of trees for shelter, shade and ornament, and their propagation; value of trees for timber; how to improve existing woodlands; influence of forests upon soils, crops and climate; establishment and management of plantations and forest trees.

For Agricultural Juniors and Second Year Two-Year Students.

Three exercises per week. W.

2. Forest Technology.

This course aims to give the student advanced theoretical and practical work in establishing, improving and managing woodlands; estimating and measuring standing timber and harvesting forest products. The physical properties of woods and forest botany and entomology are here further considered. Seminary and laboratory work.

Elective for those students showing special ability in Course 1.

Three exercises per week. F.

3. Forest Economics.

This course is special and offered only to students who have shown marked proficiency in Forestry 1 and 2. Climatic influences; soil and crop production; forest administration, forest laws and forest policies; forest distribution; and forest utilization.

Elective for those having had Course 2.

Three exercises per week. S.

FRENCH.

Asso. Prof. Whoriskey.

Courses 1, 2 and 3 are taken in Freshman year by students who offer German for admission.

1. Essentials of French Grammar and reading with practice in speaking and writing French. Dictation.

Three exercises per week. F.

2. Grammar continued. Simple stories, committing of poems to memory. Dictation.

Three exercises per week. W.

3. Reading of Modern French Prose, translation from English into French of connected narrative. Dictation.

Three exercises per week. S.

4. Reading and translation of Scientific French, Composition, Poems.

Three exercises per week. F.

5. Reading, Translation and Composition continued.

Three exercises per week. W.

6. French Prose, History and Travel; Composition based on some book read in class.

Three exercises per week. S.

7. French Prose, Sight Reading.

Hugo, Balzac, Sand.

Three exercises per week. F.

8. Classical French.

Corneille, Racine and Moliere.

Three exercises per week. W.

9. General Review of French Literature. Outside reading; sight work.

Three exercises per week. S.

Courses 10, 11 and 12 are to be given in 1907-1908 and then in alternate years with 7, 8 and 9. Announcement will be made later with regard to the authors to be studied.

GEOLOGY.

1. Mineralogy.—Prof. Parsons.

A short course in blowpipe analysis, followed by laboratory practice in the determination and study of minerals, with special reference to their economic value. For Chemical Sophomores and Engineering, General and Agricultural Juniors.

Course 1 is open only to those who have taken Chemistry 1 and 2.

Three exercises per week. S.

2. Elementary Geology.—Prof. Sanderson.

A brief course in the elements of Geology. Special attention is given to local geology and excursions are made to various points of interest in the vicinity. For Agricultural and General Seniors.

Open to those who have completed Zoology 5 and Geology 1.

Four exercises per week. F.

GERMAN.

Asso. Prof. Whoriskey.

Courses 1, 2 and 3 are taken in Freshman year by students who offer French for admission. Courses 4, 5 and 6 are taken by all Sophomores.

1. German Grammar. Declension of articles, nouns, adjectives and pronouns; verbs, weak and strong. Reading of simple stories; conversation. Dictation.
Three exercises per week. F.

2. Verbs, modal auxiliaries, essentials of syntax. Composition, Reading and Translation; Poems. Dictation.
Three exercises per week. W.

3. Reading, Translation and Composition; Sight Translation. Dictation.
Three exercises per week. S.

4. German Prose of the Nineteenth Century. Composition based on some book read in class.
Three exercises per week. F.

5. German Prose of the Nineteenth Century continued. Composition, outside reading.
Three exercises per week. W.

6. Scientific German. Composition.
Three exercises per week. S.

*7. Goethe, His Life and Works.
Three exercises per week. F.

*8. Goethe (continued).
Three exercises per week. W.

*9. Goethe (continued).
Three exercises per week. S.

* Given in 1907-1908.

10, 11 and 12. Schiller, His Life and Works. Given in 1906 and 1907.

The aim throughout the courses in French and German is to train the students to make practical use of these languages. Considerable stress is laid, therefore, on reading aloud, dictation and paraphrasing the assigned texts.

HISTORY.

PROF. SCOTT.

In the courses in History an important place is given to historical reading carried on in the reference room. In some cases a considerable part of the work is written.

Courses 1 to 3 and Courses 4 to 6 are given on alternate years, Courses 4 to 6 offered in 1905-'06.

Courses 1 to 6 are open only to those who have passed in Grecian and Roman History.

Courses 7 to 10 are open only to those who have passed in History and Constitution of the United States.

1. History of Europe from 814 to 1492. Recitations and collateral reading.

For General Course Freshmen and Sophomores.

Three or four exercises per week. F.

2. History of Europe from 1492 to 1598. Recitations and collateral reading.

For General Course Freshmen and Sophomores.

Three exercises per week. IV.

3. History of Europe from 1598 to 1715. Recitations and collateral reading.

For General Course Freshmen and Sophomores.

Three or four exercises per week. S.

4. History of Europe from 1715 to 1789. Europe at the beginning of the French Revolution. Recitations and collateral reading.

For General Course Freshmen and Sophomores.

Three or four exercises per week. F.

5. History of Europe from 1789 to 1815. The French Revolution. Recitations and collateral reading.

For General Course Freshmen and Sophomores.

Three exercises per week. W.

6. History of Europe since 1815. Recitations and collateral reading.

For General Course Freshmen and Sophomores.

Three or four exercises per week. S.

7. American History to close of Colonial Period.

For General Course Juniors and Agricultural Seniors.

Four exercises per week. F.

8. Political and Constitutional History of the United States from 1738 to 1820.

For General Course Juniors and Agricultural Seniors.

Three exercises per week. W.

9. Political and Constitutional History of the United States, 1820 to 1846.

For General Course Juniors and Agricultural Seniors.

Two exercises per week. S.

10. Political and Constitutional History of the United States since 1846.

For General Course Seniors.

Three exercises per week. F.

HORTICULTURE.

Prof. Hall.

Mr. J. K. Shaw.

With the rapid development of agricultural education, the science of horticulture has become more clearly defined. Horticulture is sub-divided into four classes, viz.: (1) Pomology, or fruit growing; (2) Olericulture, or vegetable gardening; (3) Floriculture, or flower growing; and (4) Landscape Gardening.

1. Principles of Horticulture.

This course is elementary, and comprises the fundamentals of horticulture, emphasizing the sciences upon which horticulture rests and the scope and importance of its field.

For Agricultural Freshmen.

Two exercises per week. S.

2. Olericulture.

Lectures and recitations upon the culture, classification and identification of vegetables. The storing and marketing of vegetables is also considered. This course is given as a laboratory course of fifteen exercises in the fall term for the study and identification of varieties and in the spring term twenty exercises are given to complete the course.

For Agricultural Sophomores and Second Year Two-Year Students.

Open only to those who have completed Botany 3 and are taking Botany 4.

3. Greenhouse Management.

Lectures, recitations and laboratory work. This course aims to familiarize the student with modern methods of greenhouse work and the more important plants grown under glass. Soils, varieties, culture, marketing, enemies, etc., are studied. Each student is required to do practical work in propagating, potting, watering, ventilating, etc. A study of the history and development of different types of greenhouses, including methods of heating and general management.

For Agricultural Sophomores and First Year Two-Year Students.

Three exercises per week. W.

4. Pomology and Viticulture.

The culture, classification and identification of our leading commercial fruits are taken up for study in this course, the object being to familiarize the student with modern fruit growing, both the large or orchard fruits and the small or berry fruits. Lectures, recitations and laboratory work.

For Agricultural Juniors and Second Year Two-Year Students.

Open only to those having completed Botany 1 and Zoology 3.

Three exercises per week. F.

5. Floriculture and Home Decoration.

Lectures, recitations and laboratory work. The culture and uses of ornamental plants are studied together with their history, classification, characteristics, propagation and uses on private and public grounds.

For Agricultural Juniors and Second Year Two-Year Students.

Open only to those who have completed Horticulture 3.

Three exercises per week. S.

6. Plant Breeding.

This course takes up the evolutionary study of plant life and points out through examples, largely of economic horticultural plants, their modification and improvement by mutation, crossing, dwarfing, forcing, etc. Recitations and seminary work.

For Agricultural Seniors. Elective for Two-Year Students.

Three exercises per week. W.

7. Landscape Gardening.

Lectures, recitations and laboratory work on the principles of æsthetics as applied to natural scenery; designing, mapping, staking out and planting private and public grounds, parks, cemeteries, etc., are studied and practised.

Courses Horticulture 3 and 5 must precede this course.

Three exercises per week. S.

8. Horticultural Seminary.

This course consists of the study of current horticultural literature and various advanced horticultural problems.

Preceded by Courses 6 and 7.

Two exercises per week. S.

9. Advanced Horticulture.

This course consists of special advanced work arranged to suit the needs of individual students. Open to those having completed the first five courses in Horticulture.

Three exercises per week. F.

MATHEMATICS.

PROF. PETTEE.

1. Algebra completed.

For all Freshmen.

Five exercises per week. F.

2. Solid Geometry, with advanced course.

For Freshmen entering without the subject.

Two exercises per week. F.

3. Plane and Spherical Trigonometry.

For all Freshmen.

Four exercises per week. W.

4. Surveying.

Recitations, field-work and plotting, including compass, transit, plane-table and level work. Required of Engineering, Chemical and Agricultural Freshmen. Elective for General Course Freshmen.

Three exercises per week. S.

5. Analytical Geometry.

For Engineering and Chemical Sophomores. Elective for General Course Sophomores.

Five exercises per week. F.

6. Differential Calculus.

For Engineering and Chemical Sophomores. Elective for General Course Sophomores.

Five exercises per week. W.

7. Integral Calculus.

For Engineering and Chemical Sophomores.

Five exercises per week. S.

8. Differential Equations.

For General Juniors.

Two exercises per week. F.

9. Quaternions.

For General Juniors.

Two exercises per week. W.

10. Astronomy.

For General Juniors.

Four exercises per week. W.

11. Roads, Streets and Pavements.

Recitations and lectures on construction and maintenance of paved, macadamized and gravel roads, with discussion of laws relating thereto. For Agricultural Seniors.

Three exercises per week. S.

12.

For First Year Two-Year Students.

Two exercises per week. F.

13. Continuation of 12.

Three exercises per week. W.

METEOROLOGY.

1. Meteorology.—Prof. Pettee.

Recitations and lectures on wind systems, precipitation, humidity, laws of storms and tornadoes and methods of prediction of atmospheric changes. For Agricultural and General Seniors.

Three exercises per week. S.

MECHANICAL ENGINEERING.

Prof. Read, Asst. Prof. Hancock.

1. Mechanism.

Recitations and exercises in drawing outlines of elementary combinations of parts of machines, with special reference to the relative motion of the parts, their forms and modes of connection. For Engineering Freshmen.

Open only to those who have taken Mathematics 1-24, Drawing 19-20.

Three exercises per week. S.

2. Mechanism.

For Engineering Sophomores.

Continuation of 1.

Two exercises per week. F.

3. Mechanism.

Continuation of 1 and 2.

Two exercises per week. W.

4. Mechanics of Engineering.

Courses 4, 5 and 6 are devoted to recitations in statics and dynamics. For Engineering and Chemical Juniors.

Courses 4 to 6 are open only to those who have taken Mathematics 1 to 7, inclusive, and Physics 1.

Two exercises per week. F.

5. Mechanics of Engineering.

Continuation of 4.

Four exercises per week. W.

6. Mechanics of Engineering.

Continuation of 4 and 5.

Four exercises per week. S.

7. Graphic Statics.

For Engineering and Chemical Juniors.

Two exercises per week. F.

8. Steam Engineering.

Recitations and lectures on thermodynamics, boilers and valve gears. For Engineering Juniors.

Four exercises per week. F.

Course 8 is open only to those who have taken Mathematics 1-7, Physics 1 and 2, Drawing 19-21.

9. Steam Engineering.

Continuation of Course 8.

Three exercises per week. W.

10. Steam Engineering.

Continuation of Courses 8 and 9.

Four exercises per week. S.

11. Materials of Construction.

Recitations on the production, properties, uses and preservation of engineering materials. For Engineering Seniors.

Continuation of Courses 4-6.

Four exercises per week. F.

Course 11 is open only to those who have taken Courses 4, 5, 6 and 7.

12. Hydraulics.

For Engineering Seniors.

Open only to those who have taken Courses 4 to 6.

Three exercises per week. F.

14. Mechanical Laboratory.

Tests of materials, boilers, engines, pumps, indicators, etc. For Engineering Seniors.

Course 14 is open only to those who have taken Courses 1 to 10 and must have taken or are taking 11 and 12.

Two exercises per week. F.

15. Mechanical Laboratory.

Continuation of Course 14.

Three exercises per week. W.

16. Mechanical Laboratory.

Continuation of Courses 14 and 15.

Two exercises per week S.

17. Multiple Expansion Engines.

For Engineering Seniors.

Open only to those who have taken 4-6, 8-10 and 14.

Three exercises per week. W.

18. Gas and Hot Air Engines and Refrigerating Machinery.

For Engineering Seniors.

Open only to those who have taken 4-6, 8-10, 14, 15 and 17.

Three exercises per week. S.

19. Machine Design.

For Mechanical Engineering Seniors.

The design of boilers, boiler setting details, shafting, couplings and pulleys, with regard to the principles of Applied Mechanics and strength of materials. Given as Machine Design Drawing. See Drawing 30.

Course 19 is open only to those who have taken Courses 4-6 and 8-11, and Drawing 29.

20. Contracts and Specifications.

Recitations and lectures on the laws and forms of engineering contracts and specifications. Students in this course are required to draw up specifications, write a contract and make estimates on a piece of engineering work.

For Mechanical Engineering Seniors.

Three exercises per week. W.

21. Mill Design.

Given as Drawing 32.

Three exercises per week. S.

22. Elementary Steam Engineering.

For Engineering Sophomores.

Two exercises per week. S.

23. Hydraulic Motors.

For Mechanical Engineering Seniors.

Principles of design and operation of water power plants.

Course 23 is open only to those who have taken Course 12.

One and one-half exercises per week. W.

24. Concrete-Steel Construction.

For Mechanical Engineering Seniors.

A study, from the current engineering papers, of the more recent developments in the design and construction of concrete-steel foundations, dams and buildings.

Course 24 is open only to those who have taken Course 11.

One and one-half exercises per week. W.

Course 23 is given the first five weeks and course 24 the last five weeks.

MILITARY SCIENCE AND TACTICS.

LIEUT. HUNT.

Each male student, unless a member of the Senior class, or physically unfit, is required to drill and attend recitations in military science.

COURSE OF INSTRUCTION.

1. Military Drill.

Infantry drill regulations through the school of the battalion in close and extended order.
Advance and rear guards.
Outposts.
Marches.
Ceremonies; battalion review, parades and guard mounting.
Calisthenics and gymnastics.
Rifle practice.
First aid to the injured.
Signalling.

Two exercises per week.

2. Military Science.

Infantry Drill Regulations covered by practical instruction; Manual of Guard Duty; Small Arms Firing Regulations; Articles of War; enlistment and discharge papers; morning reports; field returns; muster rolls; rosters; ration returns; requisitions; prop-

erty returns, etc., with lectures on military subjects, notes upon which are to be taken for subsequent examination.

One exercise per week.

3. Army Organization and Administration.

Lectures and preparation of military papers.
Elective for Seniors only.

One exercise per week.

PHILOSOPHY.

ASST. PROF. HARRISON.

1. The History of Educational Theory.

The greater part of the course is taken up with the study of the modern educational reformers: Comenius, Rousseau, Pestalozzi, Froebel, Spencer and Herbart.

Open to Sophomores.

Two exercises per week. W.

3. Psychology.

An introduction to the study of the mental life. The practical needs of the student are related as closely as possible to the work of the course.

Open to Juniors and Seniors.

Three exercises per week. F.

4. Philosophy of Education.

The meaning of education is defined from the aspect of the biological, the physiological, the social, the psychological and the philosophical. Horne's "Philosophy of Education."

Open to Juniors and Seniors.

Three exercises per week. W.

5. Logic.

A study of the methods, fallacies and aims of human thinking. A preparation for work in science and in philosophy.

Open to Sophomores.

Two exercises per week. S.

7, 8 and 9. Advanced Pedagogy.

A one-hour course throughout the year. Some important work on the practice of education is made the basis for study. Free discussion of the teacher's problems is made a part of the class exercises. Practice work for the students who wish it is found in the public schools at and near Durham. Extra credit is given for the practice teaching. The permission of the instructor is required before electing this course.

10. Herbartian Psychology.

This course attempts to make a thorough study of the system of Herbart and to relate his contributions to the problems of present-day teaching.

Open to Juniors and Seniors who have passed Course 3.

Three exercises per week. S.

11. Advanced Psychology.

This course is a natural continuation of Course 3. The emotional and volutional aspects of the mind are studied more carefully than is possible in the elementary course.

Open to all students who have passed Course 3.

Three exercises per week. F.

PHYSICS.

PROF. NESBIT, MR. ADAMS.

Courses 1 to 8 are taken consecutively by students of the Electrical and Mechanical Engineering Courses. Students in the Chemical Engineering Course take Courses 1 to 5, 7

and 8. Students in the course in Agriculture take Courses 1 to 4, and such part of Course 5 as may be given in the Winter term. They may also elect in the Senior year, Electrical Engineering 61, as a continuation of Physics 5. Students in the General Course are required to take either Course 1 or 21, and they may elect either Courses 21 to 25 or 1 to 5.

Course numbers 1 to 20, inclusive, are reserved for the subjects taken by Engineering students; 21 to 30, inclusive, for the General Course; 31 to 40 for the Agricultural Course Two-Year Students.

1. Mechanics.

Freshmen, three exercises per week. S.

The principles and laws of general physics are illustrated by a number of experiments, and the student is taught to make ready application of his mathematics in the solution of problems. It is intended to provide a foundation in the dynamics of solids, liquids and gases, and also in the subjects of statics and hydrostatics.

Instruction is given by lectures, recitations and problem work. The text used is Ganot's Physics. Reference is made to Ames' Theory of Physics, Watson's Physics and other standard treatises.

The Electrical and Mechanical Students take up the use of the Slide Rule in connection with this course. Slide Rules should not be bought except upon advice of the instructor.

2. Heat.

Sophomores, three exercises a week for first eight weeks. F.

The theories of heat are briefly discussed. The subdivisions of the subject, such as the nature of heat, its effects, thermometry, sources of heat, the transference and transformations of heat are considered in detail. Constant attention is given to the relation of these topics to the subject of thermo-dynamics. Ganot's Physics is used as a text.

3. Light.

Sophomores, three exercises a week for the last seven weeks. F.

The subject is approached from the geometrical and physical standpoint. A number of experiments are performed, illustra-

tive of wave motion in general, followed by a study of that form of wave motion upon which the modern theory is based.

The subject is developed progressively and due attention is given to such subjects as reflection, refraction, color, the spectrum, and interference and polarization phenomena.

The student makes a careful study of optical instruments of all classes. Ganot's Physics is used as the text.

4. Sound.

Sophomores, three exercises per week for the first five weeks. W.

The course consists of lectures and recitations, considerable emphasis being laid upon the relation of the subject to the transmission of speech.

The text used is Stone's Elementary Lessons in Sound.

5. Electricity and Magnetism.

Sophomores, three exercises per week for the last five weeks of the second term and all of the third term. W. and S.

Numerous experiments are performed to illustrate the various phenomena of electrostatics, magnetism, current electricity and electric waves. As the course advances, the attention of the student is constantly called to the applications of electricity to the arts and sciences. S. P. Thompson's "Elementary Lessons in Electricity and Magnetism" is used as a text. This course is required as a preparation for Electrical Engineering 1 to 4 and 22 to 23.

6. Elements of least Squares and the Precision of Measurements.

Juniors, three exercises per week. F.

This course is intended to serve as an introduction to the subject of Physical Measurements. It familiarizes the student with the precautions necessary in taking experimental data and of properly using his data in order to secure the most reliable results.

A large number of problems are solved, illustrating the determination of physical constants and in deducing the constants of empirical equations.

7. Physical Laboratory.

Juniors, three exercises per week. W.

The apparatus employed in the experimental part of Courses 7 and 8 is adapted to no special laboratory manual, and either notes are prepared for students' use or reference is made to the works of Ames and Bliss, E. L. Nichols, H. M. Godwin and others.

The laws of general physics are investigated experimentally. The student is encouraged to acquire skill in the manipulation of apparatus, habits of clearness and neatness in keeping records, as well as enthusiasm for independent and original investigation.

A careful study is made of the Analytical Balance, time measuring devices, heat measurements, the microscope, spectroscope, lens combinations, photometry, the laws of vibrating strings and the simple electrical measurements.

A laboratory fee of five dollars per term is required in Courses 7 and 8 to cover breakages, etc. Any unexpended balance is refunded to the student at the close of the college year.

8. Physical Laboratory.

Juniors, three exercises per week. S.

This is a continuation of Course 7 and is largely devoted to the calibration of galvanometers, ammeters, the determination of the constants of instruments, the measurement of voltages, resistances, etc.

On the completion of Courses 7 and 8, an examination is given to test the student's knowledge of physical research, both in attacking a given problem and in thinking and acting for himself.

Physics 21 to 25 are given to students who do not intend to pursue mathematics beyond the subject of Trigonometry. Their completion does not prepare the student to enter Courses 7 and 8.

21. Mechanics.

General Course Freshmen, three exercises per week. S.

This is a briefer course than Physics 1 and aims to meet the needs of the student wishing to obtain some knowledge of physical phenomena and its laws.

22. Heat.

Elective for General Course Sophomores, three exercises per week for six weeks. F.

23. Light.

Elective for General Course Sophomores, three exercises per week for five weeks. F.

24. Sound.

Elective for General Course Sophomores, three exercises per week for the last four weeks. F.

25. Electricity and Magnetism.

Elective for General Course Sophomores, three exercises per week throughout the term. W.

Physics 41 and 42 are intended to acquaint the student with the fundamental principles and facts of physics.

41. Elementary Physics.

First year Two-Year course in Agriculture, *three exercises per week. S.*

42. Elementary Physics.

Second year Two-Year course in Agriculture, *three exercises per week. F.*

This is the completion of the work begun under Course 41.

POLITICAL SCIENCE.

PROF. SCOTT.

1. Political Economy.

An elementary course, with lectures upon some of the practical questions of the day.

For Agricultural and General Sophomores and Engineering and Chemical Seniors.

Five exercises per week. S.

2. Laws of Business.

Recitations supplemented by lectures and the discussion of cases.

Two credit hours.

Courses 2 and 3 are given consecutively in the Fall term.

Five exercises per week.

For Agricultural and General Seniors.

3. American Constitutional Law.

Use is made of Pomeroy's Constitutional Law, which is supplemented by the decisions of the United States Supreme Court. Special attention is given to the connections between American constitutions and American political history.

Three credit hours.

4. Money and Banking.

Recitations, readings and lectures.
For Agricultural Seniors and General Juniors and Seniors.
Courses 4 and 6 are given in alternate years. Course 4 will be offered in the year 1906-'07.

Open only to those who have taken Course 1.

Three exercises per week. W.

5. Socialism and Social Reform.

Readings, recitations and lectures.
For Agricultural Seniors and General Juniors and Seniors.
Courses 5 and 7 are given in alternate years. Course 5 will be offered in the year 1906-'07.

Open only to those who have taken Course 1.

Three exercises per week. S.

6. International Law.

For Agricultural Seniors and General Juniors and Seniors.
Courses 4 and 6 are given in alternate years.

Three exercises per week. S.

7. Public Finance.

For Agricultural Seniors and General Juniors and Seniors. Courses 5 and 7 are given in alternate years.

Open only to those who have taken Course 1.

Three exercises per week. W.

SHOP WORK.

ASST. PROF. HANCOCK, MR. BROWN.

Three hours' work in the shop is reckoned as one exercise.

1. Wood Work.

Exercises in carpentry work, joinery and pattern making. For all male Freshmen.

Two exercises per week. F.

2. Pattern Making and Foundry.

A continuation of 1
For Chemical and Engineering Freshmen.

Two and one-half exercises per week. W.

NOTE.—Alternate with Drawing on Wednesdays.

3. Pattern Making and Foundry.

For Chemical and Engineering Freshmen.

Two exercises per week. S.

4. A course in Forging, giving the student exercises in Upsetting, Drawing, Forming and Welding.

For Mechanical and Electrical Engineering Sophomores.

Two exercises per week. F.

5. A course in Turning, Facing, Thread Cutting, Milling, Shaping, Scraping, Filing and Planing.

For Chemical Seniors and Engineering Sophomores.

Two exercises per week. W.

6-11. A Course in Machine Shop Tools and Methods.

For Mechanical Engineering Juniors and Seniors.

Considerable time is given to tool room work in the making of fine tools, such as arbors and gauges; grinding both external and internal; tempering; the use of the electric pyrometer in connection with tempering and annealing; the use of the milling machine in connection with spiral and gear cutting; bench work in fine fitting; experimental work as to different cutting speeds and angles for various forms of tools as well as with different grades of tool steel, including high speed steel. Metallography of the heat treatment of steel.

A portion of the time is taken up in the reading and discussion of the various engineering periodicals and excursions are made to large shops so that the student has an opportunity to see the above processes in practical operation.

6. For Mechanical Engineering Juniors.

Shop work.

Two exercises per week. F.

7. For Mechanical Engineering Juniors.

Shop work.

Two exercises per week. W.

8. For Mechanical Engineering Juniors.

Shop work.

Two exercises per week. S.

9. For Mechanical Engineering Seniors.

Shop work.

Two exercises per week. F.

10. For Mechanical Engineering Seniors.

Shop work.

Two exercises per week. W.

11. For Mechanical Engineering Seniors.

Shop work.

Two exercises per week. S.

12. Wood Work.

For First Year Two-Year Students.

Two exercises per week. W.

13. Iron Work.

For Second Year Two-Year Students.

Two exercises per week. S.

14. Special Shop Work.

Work arranged to suit the needs of particular students.

From one to four exercises per week. F.

15. Special Shop Work.

From one to four exercises per week. W.

16. Special Shop Work.

From one to four exercises per week. S.

17. Forging.

For Agricultural and General Course Freshmen.

Two and one-half exercises per week. W.

SPANISH.

Asso. Prof. Whoriskey.

Spanish 1, 2 and 3.

Essentials of Spanish Grammar. Translation of modern Spanish prose. Stories and plays by modern authors will be read.

Three exercises per week. F., W., S.

Elective for General Course Students in Sophomore, Junior or Senior year.

ZOOLOGY.

Prof. Sanderson, Dr. Headlee.

The courses in Zoölogy are arranged in sequence for those studying Agriculture or Economic Entomology, and for those desiring a more general course fitting them for teaching or for medical studies, though any courses offered may be taken by those who have completed previous courses necessary. See Biological Division, Agricultural Course, page 37.

1. Invertebrate Zoölogy.

The structure and life of the invertebrate animals, except insects. Lectures and laboratory dissections of typical forms. For Agricultural and General Sophomores.

Three exercises per week. F.

3. Economic Entomology.

Insects affecting crops, domestic animals, etc., their life, histories, habits and methods of combating them. Special consideration of general farm methods for control of insects affecting staple crops and of spraying, machinery and insecticides for combating truck and fruit insects. For Agricultural and General Sophomores completing Course 2.

Four exercises per week. S.

4. General Entomology.

A general survey of the structure, habits and classification of the different orders of insects. Lectures, laboratory dissections and classification. For Agricultural and General Sophomores completing Course 1.

Three exercises per week. W.

5. Vertebrate Anatomy and Physiology.

The comparison of anatomy and physiology of vertebrate animals, general physiology of higher animals, and laboratory dissections of a few typical forms. For Agricultural and General Juniors completing Courses 1 and 2.

Four exercises per week. F.

6. Principles of Zoölogy.

The history, fundamental principles, problems and philosophy of Zoölogy. Lectures. For Agricultural and General Juniors or Seniors having completed previous courses. Given in alternate year with Course 17.

Three exercises per week. W.

7. Comparative Zoölogy.

Lectures and reading upon the comparative anatomy and physiology of animals. For Agricultural and General Juniors and Seniors having completed previous courses. Alternates with Course 6.

Three exercises per week. W.

8. Economic Ornithology.

A study of the relation of birds to Agriculture, to each other and other organisms. For Agricultural and General Juniors or Seniors. Alternate with Course 9.

Three exercises per week. S.

9. Advanced Economic Entomology.

The methods of study and general principles of combating insect pests; the literature and history of economic entomology; practice in determining and rearing and combating insect pests.

For Agricultural Juniors or Seniors having completed Course 3. Alternate with Course 7.

Three exercises per week. S.

10. Advanced Entomology.

Advanced work in General Entomology; collecting, classification and anatomical studies. For General or Agricultural Juniors having completed Course 2.

Three exercises per week. S.

11, 12 and 13. Advanced Zoölogy.

Averaging four exercises per week for the year. For students who elect Zoölogy for Senior year to be arranged to suit individual needs. Open to those who have completed five previous courses and have shown proficiency in Zoölogy.

14. Elementary Zoölogy.

The structure and habits of the invertebrate and lower vertebrate animals, with special study of insects. Recitations and laboratory dissections of typical forms. For First Year Two-Year Students.

Five exercises per week first five weeks and three exercises per week balance of term. F.

15. Vertebrate Anatomy and Physiology.

The anatomy and physiology of the higher vertebrates based upon that of man and with special reference to domestic animals. Recitations and laboratory dissections and experiments. For First Year Two-Year Students completing Course 1.

Five exercises per week. W.

16. Biological Seminar.

Reports and discussions upon current literature of Zoölogy and Botany, special topics and observations. For Agricultural and General Juniors and Seniors.

One hour per week through the year.

COURSES OF STUDY AND SCHEDULE OF HOURS.

For details see Description of Studies.

Attendance is required of all students at Chapel exercises.

Military drill: Fall and Spring terms, M. and F., 11 to 12.30 p. m. Winter term, T. and Th., 10 to 12. Attendance is required of all male students, except Seniors, for whom it is elective.

FRESHMAN YEAR.

For all Four-Year Courses.

FALL TERM.

	Exercises.
Rhetoric—English 1	2
Algebra—Mathematics 1	5
Wood Work—Shop Work 1	2
Drawing—Drawing 19	2
†History—History 1 or 4	3
French—French 1 or German—German 1	3
Inorganic Chemistry—Chemistry 1	3
Solid Geometry—Mathematics 2	3
Military Science	1
Military Drill	1

WINTER TERM.

Rhetoric—English 2	2
Trigonometry—Mathematics 3	4
§Pattern Making and Foundry—Shop Work 2	2½
‡Drawing—Drawing 20	2½
†History—History 2 or 5	3
French—French 2 or German—German 2	3

† History is taken by women in place of Shop Work. It is also open to students who are prepared for advance work.

§ Engineering and Chemical courses take Shop Work 2; others Shop Work 17.

‡ For students taking History, two exercises per week in Drawing.

Inorganic Chemistry—Chemistry 2	3
Military Science	1
Military Drill	1
Forging—Shop Work 17	2½

SPRING TERM.

Rhetoric—English 3	1
†Surveying—Mathematics 4	3
Mechanics—Physics 1	3
‡Mechanics—Physics 21	3
†Botany—Botany 8	3
†Wood Work—Shop Work 3	2
†Horticulture—Horticulture 1	2
†Drawing—Drawing 21	3
†History—History 3 or 6	3
French—French 3 or German—German 3	3
†Organic Chemistry—Chemistry 3	3
Military Science	1
Military Drill	1
Mechanism—Mechanical Engineering 1	3

COURSES IN AGRICULTURE.

Sophomore Year.

FALL TERM.

	Exercises.
German 4	3
Chemistry 4	3
Zoölogy 1	3
Heat—Physics 2, eight weeks. Light—Physics 3, seven weeks	3
Horticulture 2	1
Botany 9	3
Agriculture 19	3
Military Science	1
Military Drill	1

† Students in the Engineering Course take Drawing and Shop Work. Students in Chemical Engineering also take Organic Chemistry. Students in the Agricultural Course take Botany, Surveying, Horticulture, and Organic Chemistry. Students in the General Course take Botany and History, and elect between Surveying and Organic Chemistry.

‡ General Course students elect either Physics 1 or 21.

WINTER TERM.

German 5	3
Chemistry 4	3
Zoölogy 4	3
Electricity and Magnetism—Physics 5, five weeks Sound—Physics 4, five weeks	3
Horticulture 3	3
Botany 10	3
Military Science	1
Military Drill	1

SPRING TERM.

German 6	3
Zoölogy 3	4
Horticulture 2	2
Political Science 1	5
Agriculture 20	3
Botany 11	2
Military Science	1
Military Drill	1

Junior Year.

FALL TERM.

*Botany 12 or	3
*Zoölogy 5	4
Chemistry 6	3
Dairying 1 and 3	5
Horticulture 4	3
Agriculture 2	3
Military Science	1
Military Drill	1

WINTER TERM.

†Botany 13 or	3
†Zoölogy 6 or 17 or	3
†Agriculture 11	4
Chemistry 7	2
English 4	2
Forestry 1	3
Agriculture 3	3
Agriculture 10	3
Military Science	1
Military Drill	1

*Elect either Zoology 5 or Botany 12.

†Elect one of these three or some other three-hour scientific course.

SPRING TERM.

†Agriculture 12 or	3
†Zoölogy 7, 9 or 10 or	3
†Botany 14	3
English 5	2
Geology 1	3
Horticulture 5	3
Agriculture 4	3
Agriculture 13	4
Military Science	1
Military Drill	1

NOTE.—English 7. A course in debating, one hour per week, is required in the Junior year, either in the winter or spring term.

†Elect one of these three or some other three-hour scientific course.

During the Junior year students who desire and are qualified to take up work in the Biological or Chemical Division of the Agricultural Course may substitute work in those divisions for Dairying, Agriculture 11 and Agriculture 12.

SENIOR YEAR.

FALL TERM.

(Required.)

	Exercises per week.
Geology 2	4
History 7	4
Agriculture 15	2
Thesis	1

(Six hours elective from any courses offered.)

WINTER TERM.

(Required.)

Political Science 6	3
History 8	3
Horticulture 6	3
Thesis	2

(Six hours elective from any courses offered.)

SPRING TERM.

(Required.)

Meteorology 1	3
Agriculture 16	3
Agriculture 17	3
Thesis	2

(Six hours elective from any courses offered.)

COURSES IN ENGINEERING.

Sophomore Year.

FALL TERM.

	Exercises per week.
Analytic Geometry—Mathematics 5	5
Descriptive Geometry—Drawing 23	2
Heat—Physics 2, eight weeks. Light—Physics 3, seven weeks	3
German—German 4	3
Forge Shop—Shop Work 4	2
Mechanism—Mechanical Engineering 2	2
Chemical Laboratory—Chemistry 5	2
Military Science	1
Military Drill	1

WINTER TERM.

Differential Calculus—Mathematics 6	5
Machine Drawing—Drawing 25	2
Sound—Physics 4, five weeks Electricity and Magnetism—Physics 5, five weeks	3
German—German 5	3
Machine Shop—Shop Work 5	2
Mechanism—Mechanical Engineering 3	2
Chemical Laboratory—Chemistry 5	2
Military Science	1
Military Drill	1

SPRING TERM.

Defferential Calculus—Mathematics 7	5
Electricity and Magnetism—Physics 5	3
German—German 6	3
Machine Drawing—Drawing 26	5
Elementary Steam Engineering—Mechanical Engineering 22	2
Military Science	1
Military Drill	1

COURSE IN ELECTRICAL ENGINEERING.

Junior Year.

FALL TERM.

	Exercises per week.
Mechanics of Engineering—Mechanical Engineering 4	2
Theoretical Electricity—Electrical Engineering 4	3
Least Squares and Precision of Measurements—Physics 6	3
Steam Engineering—Mechanical Engineering 8	4
Direct Currents and Direct Current Dynamos, Electrical Engineering 1	3
Machine Drawing—Drawing 27	2
Graphic Statics—Mechanical Engineering 7	2
Military Science	1
Military Drill	1

WINTER TERM.

Mechanics of Engineering—Mechanical Engineering 5	4
Physical Laboratory—Physics 7	3
Steam Engineering—Mechanical Engineering 9	3
Direct Current Dynamos and Motors—Electrical Engineering 2	3
Theoretical Electricity—Electrical Engineering 5	3
Elementary Machine Design—Drawing 28	2
Debating—English 7	1
Military Science	1
Military Drill	1

SPRING TERM.

Mechanics of Engineering—Mechanical Engineering 6	4
Physical Laboratory—Physics 8	3
Steam Engineering—Mechanical Engineering 10	4
Direct Current Dynamos and Motors—Electrical Engineering 3	6
*Theoretical Electricity—Electrical Engineering 6	
Engine Drawing—Drawing 29	2
Military Science	1
Military Drill	1

Senior Year.

FALL TERM.

Materials of Construction—Mechanical Engineering 11	4
Theoretical Electricity—Electrical Engineering 7	6
Mechanical Laboratory—Mechanical Engineering 14	2
The Telephone, Electrical Engineering 20, six weeks	3
The Telegraph, Electrical Engineering 21, six weeks	
Storage Batteries, Electrical Engineering 22, three weeks	
Hydraulics—Mechanical Engineering 12	3
Electrical Laboratory—Electrical Engineering 31	2
**Military Drill	1

WINTER TERM.

Theoretical Electricity—Electrical Engineering 8	6
Alternating Current Phenomena—Electrical Engineering 9	3
Electrical Laboratory—Electrical Engineering 16	2
Electrical Lighting—Electrical Engineering 23, six weeks	3
Power Distribution for Electric Railroads—Electrical Engineering 24, four weeks	
Mechanical Laboratory—Mechanical Engineering 15	3
Multiple Expansion Engines—Mechanical Engineering 17	3
**Military Drill	1

SPRING TERM.

Alternating Current Phenomena—Electrical Engineering 10, first five weeks	3
High Tension Power Transmission—Electrical Engineering 25, last five weeks	

* See assignment of time under Electrical Engineering 6, in Description of Subjects.

**Elective.

Electrical Laboratory—Electrical Engineering 33, first five weeks	2
Political Economy—Political Science 1	5
Mechanical Laboratory—Mechanical Engineering 16	2
Gas and Hot Air Engines—Mechanical Engineering 18	3
Thesis—Electrical Engineering 34	3
**Military Drill	1

COURSE IN MECHANICAL ENGINEERING.

Junior Year.

FALL TERM.

	Exercises per week.
Mechanics of Engineering—Mechanical Engineering 4	2
Least Squares and Precision of Measurements—Physics 6	3
Steam Engineering—Mechanical Engineering 8	4
The Elements of Electrical Engineering 41	3
Iron Work—Shop Work 6	2
Machine Drawing—Drawing 27	2
Graphic Statics—Mechanical Engineering 7	2
Military Science	1
Military Drill	1

WINTER TERM.

Mechanics of Engineering—Mechanical Engineering 5	4
Physical Laboratory—Physics 7	3
Steam Engineering—Mechanical Engineering 9	3
The Elements of Electrical Engineering—Electrical Engineering 42	3
Iron Work—Shop Work 7	2
Elementary Machine Design—Drawing 28	2
Debating—English 7	1
Military Science	1
Military Drill	1

SPRING TERM.

Mechanics of Engineering—Mechanical Engineering 6	4
Physical Laboratory—Physics 8	3
Steam Engineering—Mechanical Engineering 10	4
Alternating Currents—Electrical Engineering 43	3
Iron Work—Shop Work 8	2
Engine Drawing—Drawing 29	2
Military Science	1
Military Drill	1

**Elective.

Senior Year.

FALL TERM.

Materials of Construction—Mechanical Engineering 11	4
Hydraulics—Mechanical Engineering 12	3
Machine Design—Drawing 30	5
Mechanical Laboratory—Mechanical Engineering 14	2
Iron Work—Shop Work 9	2
Alternating Currents, Electrical Engineering 44, first eight weeks Applications of Electricity, Electrical Engineering 45, last seven weeks	3
**Military Drill	1

WINTER TERM.

Mill Design—Drawing 31	4
Mechanical Laboratory—Mechanical Engineering 15	3
Multiple Expansion Engines—Mechanical Engineering 17	3
Iron Work—Shop Work 10	1
Specifications and Contracts—Mechanical Engineering 20	3
Thesis	2
*Hydraulic Motors—Mechanical Engineering 23	1½
*Concrete Steel Construction—Mechanical Engineering 24	1½
**Military Drill	1

SPRING TERM.

Gas and Hot Air Engines—Mechanical Engineering 18	3
Mechanical Laboratory—Mechanical Engineering 16	2
Political Economy—Political Science 1	5
Iron Work—Shop Work 11	2
Thesis	3
Mill Design—Drawing 32	3
**Military Drill	1

COURSE IN CHEMICAL ENGINEERING.

Sophomore Year.

FALL TERM.

	Exercises per week.
Analytic Geometry—Mathematics 5	5
Elementary Machine Drawing—Drawing 24	2
German—German 4	3

* Hydraulic Motors is given 3 exercises per week the first five weeks and Concrete-Stone Construction 3 exercises per week the last five weeks.

**Elective.

Chemical Laboratory—Chemistry 4	5
Heat—Physics 2, eight weeks Light—Physics 3, seven weeks	3
Military Science	1
Military Drill	1

WINTER TERM.

Differential Calculus—Mathematics 6	5
German—German 5	3
Chemical Laboratory—Chemistry 10	7
Sound—Physics 4, five weeks Electricity and Magnetism—Physics 5, five weeks	3
Military Science	1
Military Drill	1

SPRING TERM.

Integral Calculus—Mathematics 7	5
Mineralogy—Geology 1	3
German—German 6	3
Organic Chemistry—Chemistry 8	2
Chemical Laboratory—Chemistry 11	3
Electricity and Magnetism—Physics 5	3
Military Science	1
Military Drill	1

Junior Year.

FALL TERM.

Chemistry of Plant Growth—Chemistry 6	3
Organic Chemistry—Chemistry 9	3
French—French 4	3

TWO-YEAR COURSE IN AGRICULTURE.

This course was established by the Legislature in 1895. Its aim is to provide an opportunity for those students whose circumstances are such that it would be impossible for them to take a four year collegiate course in agriculture, but yet who are anxious and would be greatly benefited by taking a less extended training for their life work.

The course is especially desirable for the young, bright boys of the farm who expect to make a business of some line of agricultural or horticultural work. The course of study is in part the same as that which the students of the long course take. As thorough instruction is given in agronomy, animal industry, dairying, horticulture, forestry, economic entomology, botany and the underlying sciences as the time will permit. The second year contains optional work, so that it is possible for students to specialize in horticulture, animal industry or dairying.

Ten hours per week on the average are spent in practical work upon the farm, in the barn, greenhouses or shops.

The course is open to "students who can pass a fair and reasonable examination in reading, spelling, writing, arithmetic, English grammar, geography and history of the United States."

For those who do not bring certificates to show their proficiency in these subjects an entrance examination in geography, arithmetic, English and United States history will be given on Tuesday afternoon and Wednesday morning of the opening week of school.

No degree is given on the completion of this course, but a certificate is issued stating fully the work done.

COURSE OF STUDY FOR FIRST YEAR OF TWO-YEAR COURSE.

FALL TERM.

	Exercises per week.
*Mathematics 12	2
English 11 and 1	5
Botany 1	3
*Zoölogy 14	3
Horticulture 1	1
Agriculture 1	3
Agriculture 18	3

TEN-WEEKS COURSE IN AGRICULTURE.

The college offers a Winter Course in Agriculture, beginning Tuesday, January 8, and continuing until Friday, March 15, 1906.

No entrance examinations are required for this course, but students taking it must possess a good common school education. The course is especially desirable for students of mature years who can find the time to come from the farm during the winter and study some of the principles of agricultural science.

The courses of study offered are dairying, stock feeding, principles of breeding, veterinary elements, poultry, breeds of dairy cattle, greenhouse management, forestry, soil physics, botany and entomology, together with practical work in the creamery, forge, wood and machine shops and greenhouses.

Since the hours of study for the above named courses are scheduled on other pages of the catalogue, they are not repeated here in a separate schedule. Those contemplating taking the course should decide what studies they wish to pursue and then make out a schedule of hours for themselves.

A fee of $5 is charged for tuition.

The expenses of the course may be estimated as follows:

Room and board, 10 weeks at $4	$40.00
Tuition fee	5.00
Books	5.00
Total	$50.00

Applicants should report at the president's office in Thompson Hall on Tuesday, January 8, 1906.

TEN-WEEKS COURSE IN DAIRYING OR DAIRY SCHOOL.

The eleventh annual Dairy School of the New Hampshire College of Agriculture and the Mechanic Arts will open on Tuesday, January 8, and continue 10 weeks. The object of this school is to furnish a broad and substantial foundation for those who would become successful creamery managers or dairy farmers. It offers a short route to a successful career that must otherwise require years of experience to attain. The subjects taught have a practical bearing on the every-day affairs connected with the various branches of the dairy industry.

TUITION, EXPENSES, ETC.

There is no age limit for students, and no entrance examination is required. A tuition fee of five dollars is payable at the beginning of the term; other expenses, including books, room and board for 10 weeks will amount to approximately sixty dollars.

Owing to the limited space for class work in the dairy building, the number of students must necessarily be limited to the men who first make application for admission.

A detailed description of the studies offered is here given.

Students completing the required work of the Dairy School and passing satisfactory examinations in all subjects will be given a certificate.

DAIRY BUILDING AND EQUIPMENT.

The dairy building is a wooden structure of one and one-half stories with basement. It is divided into rooms for

testing, separating and churning. There is also an engine room and an office for the dairy instructor.

All available space is occupied by the various forms of separators, milk testers, milk coolers, churns, butter-workers, etc. Dairy students are taught to use all the latest and best appliances obtainable. Steam power is supplied by the large boilers at the power house. In addition to the product of the college herd, milk and cream are received from about thirty farms in Durham and vicinity. Through this arrangement the college furnishes plenty of milk for practice work, and provides for a complete and practical training in creamery and dairy management.

MILK AND ITS PRODUCT.

Prof. F. W. Taylor.

Lectures and recitations on the secretion, nature and composition of milk, its uses and value as an article of food. It also deals with causes and conditions influencing the quality of milk and the care of milk on the farm.

Class-room work is supplemented by daily practice in the creamery. The student is trained to perform all parts of the work and to thoroughly understand the details that make possible the production of fine butter.

The student will study the construction, operation and care of the various appliances used in the dairy or creamery, and will be required to take apart and assemble the various machines, operate them carefully and efficiently, and present a written description of each machine and the result of his investigations with special reference to capacity, speed and efficiency. Plans of dairy and creamery buildings, with estimates for building will be required.

MILK TESTING.

Mr. F. A. Tinkham.

The use of the Babcock test in apportioning the money value of milk is now regulated by state law and the value of

the test in the successful management of the dairy herd has created a demand for practical training. The course will include lectures and recitations on the principles of the Babcock test and its application on the dairy farm and in the creamery or mlk inspector's laboratory. A careful study of all its details will be required. Under the guidance of the instructor the student will practice testing milk, cream, skim-milk and buttermilk until fully competent to perform the work for himself or for others. In connection with the lactometer the test will be made the subject of practice in estimating the solids of milk.

CHEMISTRY OF MILK AND BUTTER.

Professor Fred W. Morse.

The subject is taken up in a course of 10 lectures, illustrated by experiments and specimens, and includes the properties and separation of the different constituents of milk, fat, casein, albumen, sugar, etc., the composition of butter and butter-fat and the properties and effects of preservatives.

DAIRY BACTERIOLOGY.

Mr. F. A. Tinkham.

Lectures, recitations and demonstrations, covering the more important facts in the relation of bacteria to dairying, with instruction and practice in pasteurizing milk and cream for market or butter making and in preparing and using cultures in ripening cream.

BOILERS AND ENGINES.

Assistant Professor E. H. Hancock.

Lectures will be given on the construction, operation and care of boilers, motors, steam and gasoline engines. The lectures will be followed by practical demonstrations and practice in the management of the various motive powers. Instruction will also be given in pipe cutting and fitting and other work incidental to the management of a steam plant.

INSECTS AFFECTING CATTLE.

Professor E. Dwight Sanderson.

Lectures on the horn-fly, warble-fly, cattle lice and similar pests, with especial reference to their life histories and methods of combating them.

BREEDS AND BREEDING.

Assistant Professor E. L. Shaw.

Lectures and recitations upon the origin, history, distribution, characteristics, adaptability and standard of excellence of the pedigreed breeds of dairy cattle, with special reference to the selection of breeds and individual animals for the dairy herd.

Lectures and recitations upon the principles of breeding as exhibited through the laws of heredity, variation and selection; methods of breeding, including a discussion of in-breeding, cross-breeding and influence of environment.

Practice in judging the dairy breeds.

FEEDS AND FEEDING.

Assistant Professor E. L. Shaw.

Lectures and recitations upon the composition and digestibility of feeding stuffs; the preservation and preparation of coarse fodders, ensilage; grinding, steaming and cooking food. A careful study of the different feeds upon the market and their value in a dairy feeding ration. Practice will be given in computing and compounding rations for the dairy cow.

DISEASES OF CATTLE.

Assistant Professor E. L. Shaw.

Lectures and recitations upon the anatomy of the cow, with special reference to the digestive, reproductive and milk-producing organs, the common diseases, the causes and the methods of treatment.

AGRICULTURAL EXPERIMENT STATION.

This department of the college is provided for by the National Government. The appropriations for the current year aggregate $22,000.

The Acts of Congress provides,—

"That it shall be the object and duty of said Experiment Stations to conduct original researches or verify experiments on the physiology of plants and animals; the diseases to which they are severally subject, with the remedies for the same; the chemical composition of useful plants at their different stages of growth; the comparative advantages of rotative cropping, as pursued under a varying series of crops; the capacity of new plants or trees for acclimation; the chemical composition of manures, natural or artifical, with experiments designed to test their comparative effects on crops of different kinds; the adaptation and value of grasses and forage plants; the composition and digestibility of the different kinds of food for domestic animals; the scientific and economic questions involved in the production of butter and cheese; and such other researches or experiments bearing directly on the agricultural industry of the United States as may in each case be deemed advisable, having due regard to the varying conditions and needs of the respective states and territories."

COMMENCEMENT, 1906.

On Commencement Day, June 6, 1906, the following degrees were conferred:

BACHELORS OF SCIENCE.

IN AGRICULTURE.

Charles S. Batchelder, South Hampton.
Clarence Elbert Clement, Derry.
Cyrus Fremont Jenness, Gonic.

IN CHEMISTRY.

Stuart Kendrick Barnes, Walpole.
Carl Tilson Fuller, Nashua.
Wallace Fuller Purington, South Yarmouth, Mass.
Edwin Jay Roberts, Laconia.

IN ELECTRICAL ENGINEERING.

Samuel Taylor Adams, Pittsfield.
Neil Starr Franklin, Bernardston, Mass.
William Safford Gooch, Exeter.
Ralph Edward Gowen, Stratham.
Allen Montague Johnson, Nashua.
Charles Leo Tuttle, Exeter.

IN GENERAL COURSE.

William Cassius Campbell, West Windham.
John Dustin Clark, Nashua.
Ernest Luther Converse, Amherst.

IN MECHANICAL ENGINEERING.

Edwin Davis Hardy, Nashua.
Roy Vance Swain, Barrington.

MASTERS OF SCIENCE.

John Leslie Randall, Lee.
William Orrin Robinson, Marlborough.

MECHANICAL ENGINEER.

Lewis H. Kenney, '99, Philadelphia, Pa.

CERTIFICATES.

Certificates from the Two-Year Course in Agriculture were awarded to—
Alfred Walker Clough, Greenland.
Oliver Carter Dimond, West Concord.
Ralph Wayne Forristall, Alstead.
Stanley Hargreaves, Durham.
Robert Stanley Sawyer, Walpole.

HONORARY DEGREES.

MASTER OF SCIENCE.

Henry C. Morrison, A. M., Concord, State Superintendent of Public Instruction.

BACHELOR OF SCIENCE.

Harry F. Hall, Durham, Instructor in Horticulture and Associate Horticulturist to New Hampshire Agricultural Experiment Station, New Hampshire College.

PRIZE RECORD FOR 1906.

BAILEY PRIZE—$10.

Given by Dr. C. H. Bailey of the Class of '79, and E. A. Bailey of the Class of '85.

Stuart Kendrick Barnes, Walpole.

ERSKINE MASON MEMORIAL PRIZE.

Ernest Luther Converse, Amherst.

SENIOR STANDING HIGHEST IN THE MILITARY DEPARTMENT.

Willis Cassius Campbell, West Windham.

WINNER OF INDIVIDUAL PRIZE DRILL.

James William Tucker, '09, Concord.

HONORABLE MENTION.

Abram Lawrence Dean, 1st year, 2 year.

PRIZE SWORD—EXCELLENCE IN DRILL.

Andrew Broggini, '07, Concord.

HONORABLE MENTION.

Frank W. Randall, '07, Portsmouth.

COLOR COMPANY—FALL TERM.

Company B.

Valentine Smith Scholarships are held by—

W. W. Kirkpatrick, '08.
J. Glenn Powers, '07.
Wm. S. Campbell, '09.
E. D. French, '10.

ROSTER OF BATTALION.

For 1906--1907.

COMMANDANT.

First Lieut. William E. Hunt, Eighth U. S. Infantry.

CADET OFFICERS.

Maj. W. G. Murchie.
First Lieut. and Adjt. J. T. Croghan.
Second Lieut. and Q. M. L. A. Carlisle.
Sergt. Maj. C. F. Cone.
Q. M. Sergt. W. W. Evans.
Color Sergt. R. E. Wadleigh.
Sergt. Signal Corps A. H. Barton.

Company A.	Company B.
Capt. F. W. Randall.	Capt. A. Broggini.
1st. Lieut. F. W. Woodman	1st Lieut. M. C. Huse.
2nd Lieut. A. M. Batchelder	2nd Lieut. H. D. Walker.

First Sergeants.

W. L. Adams.	L. H. Kimball.

Sergeants.

G. A. Perley.	O. L. Farwell.
C. D. Kennedy.	G. L. Waite.
H. S. Townsend.	C. S. Wendell.
H. H. Wilkins.	L. L. Smalley.

Corporals.

W. B. Parker.
M. D. Merrill.
R. B. Hammond.
H. E. Wilder.
W. B. Hurlburt.
M. H. Sanborn.
L. A. Pratt.
H. L. Jenness.
C. B. Wilkins.
P. M. Osgood.
A. L. Dean.
E. M. Stevens.

Musicians.

W. F. Langelier.
P. R. Crosby.

Band.

1st Lieut. L. D. Batchelor
Sergeant F. Clough.
Sergeant S. F. Hill.
Corporal M. G. Buss.
Corporal C. L. Wood.
Corporal O. D. Goodwin.
Corporal P. F. Ellsworth.

Principal Musician.
P. R. Berry.

Drum Major.
J. W. Tucker.

REGISTER OF GRADUATES.

NOTE.—The arrangement is: (*a*) Name in full. (*b*) Later degrees taken. (*c*) Residence at time of entering college. (*d*) Occupation, etc. (*e*) Present residence. *Dead. †Present address unknown. Graduates are earnestly requested to inform R. Whoriskey, chairman of the Catalog Committee of any changes that should be made in this list.

DOCTOR OF SCIENCE.

Ned Dearborn, D. Sc, 1901. Curator Field Museum.
Chicago, Ill.

MASTER OF SCIENCE.

Alfred Conradi, M. S., 1902. B. Sc (Ag) '01, O. S. U. Prof. of Zoology; State Entomologist and Entomologist. Experiment Station. *College Station, Texas.*

John I. Randall, M. S. 1906. See class of 1905.

William O. Robinson, M. S., 1906. Mechanical Engineer. See class of 1905.

Lewis H. Kenney, M. E., 1906. See class of 1899.

BACHELORS OF SCIENCE.

1871.

William Preston Ballard, Concord. Farmer.
R. F. D., Route 1, Concord.

Lewis Perkins, Hampton. Retired. *Hampton, N. H.*

Charles Henry Sanders, Penacook. Merchant.
Main Street, Penacook.
3—

1872.

Edwin Bartlett, Bath. Ranchman and Stock Raiser.
Spearville, Ford Co., Kansas.

Frank Alexander White, Bow. Surveyor, Farmer.
Route 4, Concord.

Henry N. Gowing. (1905.) Dublin. Poultryman and Fruit Grower. *Dublin, N. H.*

Alfred Walter Clough. (1906.) *Greenland.*

Oliver Carter Dimond. (1906.) West Concord. Farmer.
R. F. D. No. 2, West Concord.

Ralph Wayne Forristall. (1906.) Alstead. Farmer. *Alstead.*

Stanley Hargreaves. (1906.) Foreman, Forest Park, Springfield, Mass.

Robert S. Sawyer. (1906.) Farmer. *Walpole, N. H.*

SUMMARY.

Graduates, Bachelors of Science, 1871-1905	295
Graduates, Two Years' Course	30
Agriculturists	57
Architects	1
Business Pursuits	58
Chemists	9
Clergyman	1
Civil, Mechanical, Electrical and Mining Engineers	46
Draftsmen	5
Graduate Students	4
Lawyers	5
Manufacturers and Mechanics	17
Mining	6
Physicians	13
Teachers	30
Unknown	23
United States Army	2
United States Weather Bureau	6
Dead	17

ALPHABETICAL LIST OF GRADUATES.

Adams, E. E., 1878.
Adams, G. E., 1885.
Adams, F. S., 1895.
Adams, S. T., 1906.
Adair, R. K., 1877.
Alden, R. S., 1885.
Aldrich, H. C., 1876.
Aldrich, W. H., 1875.
Aldrich, T. E., 1881.
Andrews, H. P., 1900.
Angier, W. E., 1885.
Arnold, E. F., 1883.
Ashton, L., 1904.
Bailey, C. H., 1879.
Bailey, E. A., 1885.
Baker, H. C., 1899.
Ballard, W. P., 1871.
Barker, P. L., 1892.
Barker, W. A., 1904.
Barnard, H. E., 1899.
Barnard, H. L., 1881.
Barnes, S. K., 1906.
Barney, H. W., 1897.
Bartlett, Miss C. A., 1897.
Bartlett, D. B., 1900.
Bartlett, E., 1872.
Bartlett, Miss M. B., 1897.
Batchelder, C. S., 1906.
Batchelder, E. G. (2 year), 1904.
Batchelor, H. D., 1903.
Bickford, E. C., 1904.
Bickford, E. F., 1903.
Bickford P. G., 1885.
Bigelow, F. L., 1883.
Birtwhistle, F. S., 1883.
Blodgett, C. N. (2 year), 1901.
*Boardman, G. J., 1881.
Boutwell, H. L., 1882.
Brew, G. R. (2 year), 1902.
Brierley, H. G. (2 year,) 1903.
Brigham, E. L., 1876.
*Brill, A. W., 1885.
Bristol, E. F., 1881.
Bristol, N. D., 1883.
Britton, F. C., 1895.
Britton, W. E., 1893.
*Brooks, H., 1877.
Brooks, P. C., 1885.
Brown, B. S., 1894.
Brown, F. R., 1903.
Bryant, F. J., 1893.
Buck, W. F., 1897.
Bugbee, D. J., 1882.
Burbeck, E. W., 1903.
Burleigh, A. T., 1881.
Burleigh, R. F., 1882.
Burnham, Miss F., 1900.
Butterfield, J. W., 1876.
*Butterfield, R. C., 1898.
Buzzell, Miss H., 1898.
Calderwood, H. H., 1901.
Campbell, P. A., 1904.
Campbell, W. C., 1906.
Carpenter, L. J., 1882.
*Carr, M. B., 1888.
Carson, J. W., 1877.
Caverno, Miss B. E., 1898.
Chamberlin, A. F., 1876.
Chapin, R. C., 1879.
Chesley, J. H., 1905.

* Dead.

*Chubert, C. O., 1877.
Clark, J. D., 1906.
Clement, C. E., 1906.
Clement, H. E., 1899.
Clough, A. W. (2 year), 1906.
Colby, F. H., 1889.
Colby, I. A., 1899.
Colburn, A. W., 1897.
Cole, E. G., 1891.
Comings, Miss C. L., 1897.
Comings, F. P., 1883.
*Comings, Miss M. E., 1897.
Conradi, Albert M. S., 1902.
Converse, E. L., 1906.
Corbett, B. A., 1898.
Courser, C. H., 1900.
Cragin, L. M., 1879.
Cross, A. B., 1876.
*Cummings, E. S., 1884.
Currier, W. S., 1887.
Curtis, F. P., 1875.
Cushman, R. L. (2 year), 1901.
Davis, E. G., 1903.
Davis, F. A., 1886.
Davis, F. C., 1884.
Davis, H. G., 1888.
Dearborn, N., D. Sc., 1901.
Dennett, I. L., 1897.
Dewey, E. P., 1882.
Demond, O. C. (2 year), 1906.
Dodge, C. O., 1905.
Doe, Miss Mary, 1902.
Dorr, Miss A. E., 1901.
Dunn, A. G. (2 year), 1905.
Durell, F. J. (2 year), 1900.
Durgin, A. C., 1898.
*Edwards, C. A., 1877.
Eldredge, F. E., 1873.
Elliott, H. A. (2 year), 1900.
Ely, F. D., 1881.
Emerson, F. J., 1885.
Emerson, F. V., 1875.
Emery, S. E., 1881.
Evans, H. W., 1901.
Everett, R. M., 1891.
Farr, C. W., 1904 (2 year), 1902.
Farwell, H. G., 1901.
*Flint, W. F., 1877.
Flint, W. P. (2 year), 1904.
Follansbee, F. H., 1883.
Foord, J. A., 1898.
Forristall, E. H., 1897.
Forristall, R. W. (2 year), 1906.
Foster, S. M., 1884.
Foye, Miss B. M., 1900.
Franklin, N. S., 1906.
French, A. C., 1883.
Fuller, C. T., 1906.
Fuller, F. D., 1892.
Fullerton, J. W., 1898.
Gay, J. E., 1883.
Gerrish, E. C., 1888.
Gillis, L. C., 1889.
Gilmartin, E. W., 1902.
Given, A., 1898.
Gooch, W. S., 1906.
Goodrich, J. E., 1904.
Gowen, Miss E. G., 1901.
Gowen, R. E., 1906.
Gowing, H. N. (2 year), 1905.
Gunn, F. W., 1894.
Hall, C. C., 1877.
Hancock, E. H., 1898.
Hardy, A. W., 1887.
Hardy, C. W., 1875.
Hardy, E. D., 1906.
Hardy, M. F., 1874.
Hargreaves, S. (2 year), 1906.
Harvey, J. E., 1886.
Hayden, S. B., 1905.
Hayden, W. D. F., 1899.
Hayes, H. L., 1905.
Hayes, L. D., 1897.
Hayes, Miss M. L., 1898.
Hayes, W. C., 1905.
Hazen, A., 1885.
Hazen, C. H, 1881.
Hazen, W. N., 1888.

SPECIMEN ENTRANCE EXAMINATION PAPERS FOR FOUR-YEAR COURSES.

ALGEBRA.

1. Define Algebra, formula, radical, imaginary, degree of equation, simultaneous equations.

2. Explain negative exponents.

Divide $x^{-3}-1$ by $x^{-\frac{9}{4}}-x^{-\frac{3}{2}}+x^{-\frac{3}{4}}-1$.

3. Factor $6x-21y^{2}x-8y+28y^{3}$; $1-25x^{2}y^{2}$; $x^{2}+x-6$; $a^{5}-b^{5}$; $a^{3}+b^{3}$; $x^{3}+2x^{2}-x-2$.

4. $3ax+b+cx-2d=0$. Solve for x.

$3y+7x=10$. $2x-2y=3$. Solve for x and y.

5. Find square root of $4x^{4}-4x^{3}-3x^{2}+2x+1$; of $9+2\sqrt{8}$.

6. Multiply $3\sqrt{-3}$; $-2a\sqrt{b}$; $-3b\sqrt{3c}$; $-2c\sqrt{2ab}$.

Rationalize denominator of $\dfrac{\sqrt{2}-\sqrt{3}}{\sqrt{2}+\sqrt{3}}$

7. $3x^{2}-5x+10=0$. Solve for x.

$3ax^{2}-2x+3bx+c+7=0$. Solve for x.

8. $(x+3b)^{5}$. Expand by binominal formula.

9. A man's age plus that of his wife is 95 years. 40 years ago he was twice as old as she was then. What are their ages now? State the above.

10. A boat's crew can row 9 miles down a river and back in 4 hours. The rate of rowing in still water is double the rate of the current. Find the rate of rowing and the rate of the current. State the above.

PLANE GEOMETRY.

1. Define isosceles triangle, parallelogram, rhombus, trapezoid, limit of a variable.

2. If two parallel lines be cut by a third straight line, the sum of the two interior angles on the same side of the secant line is equal to two right angles. Demonstrate.

3. The three bisectors of the three angles of a triangle meet in a point. Demonstrate.

4. The sum of the interior angles of a polygon is equal to two right angles, taken as many times less two as the figure has sides. Demonstrate.

5. The radius perpendicular to a chord bisects the chord and the arc subtended by it.

6. Given a side of a triangle, its vertical angle, and the radius of the circumscribing circle; construct the triangle.

7. If a line be drawn through two sides of a triangle parallel to the third side, it divides those sides proportionally.

8. To find a mean proportional between two given lines. Demonstrate.

9. Construct a square equivalent to the sum of a given triangle and a given parallelogram.

10. A ten-inch water pipe discharges 200 gallons a minute. What is the diameter of a pipe that discharges 800 gallons a minute under the same pressure?

SOLID GEOMETRY.

1. A plane perpendicular to each of two intersecting planes is perpendicular to their intersection. Demonstrate.

2. An oblique prism is equivalent to a right prism, having for its base a right section of the oblique prism, and for its altitude a lateral edge of the oblique prism. Demonstrate.

3. Find the ratio of the volumes of two rectangular parallelopipeds, whose dimensions are 8, 12, and 21, and 14, 15, and 24, respectively.

4. A triangular pyramid is equivalent to one-third of a triangular prism having the same base and altitude. Demonstrate.

5. The volume of a truncated triangular prism is equal to the product of a right section by one-third the sum of the lateral edges. Demonstrate.

6. Find the lateral edge, lateral area, and volume of a frustum of a regular triangular pyramid, the sides of whose bases are 18 and 6, respectively, and whose altitude is 24.

7. The sum of the squares of the four diagonals of a parallellopiped is equal to the sum of the squares of its twelve edges.

8. In two polar triangles, each angle of one is measured by the supplement of that side of the other of which it is the pole. Demonstrate.

9. If the unit of measure for angles is the right angle, the area of a spherical triangle is equal to its spherical excess, multiplied by the area of a tri-rectangular triangle. Demonstrate.

10. How many cubic feet of metal are there in a hollow cylindrical tube 18 ft. long, whose outer diameter is 8 in., and thickness 1 in. ? (Find the difference of the volumes of two cylinders of Revolution. $\overline{\prod}=3.1416$.)

PLANE TRIGONOMETRY.

1. Write tan. $(x+y)$; sin. $(x-y)$; cos. $(2x)$; sin. $(2x)$.

2. Prove sin. $2x=\dfrac{2 \text{ tan. } x}{1+\text{tan. }^2x}$

3. $51° 20'$. Change to radians.

   $5/4\ \overline{\prod}$ Change to degrees.

4. Construct approximate line values of trigonometric functions of angle of 120 degrees.

5. In oblique plane triangle ABC the three sides a, b, c, are given. Write formula for Angle A.

6. The parallel sides of a trapezoid are 26 and 132, and the angles at the extremities of the latter are 53 degrees, 49 minutes and 67 degrees, 55 minutes. Write the formulas for the non-parallel sides.

BOTANY.

1. Describe the form, structure and reproduction of a particular crypotogamous, or flowerless, plant.

2. What are the following and what part does each play in the life of the plant; chlorophyll, stoma, epidermis, root-hair, protoplasm?

3. Describe an exogenous stem as seen in cross-section. How does it differ from an endogenous stem?

4. Give the meaning of the following; plumule, cotyledon, radicle, testa, epidermis.

5. What is the difference between a fruit and a seed? Name four kinds of fruit and give an example of each.

6. Define corolla, anther, stigma, pistil, sepal, spike, tendril.

7. What is a tuber? A bulb? A stolon? A bract? A node? A petiole? Give an example of each.

ENGLISH.

Where and how long have you studied English? What text books did you use?

Write about one hundred words on each of the following questions, paying great attention to the composition and punctuation.

1. The appearances of the supernatural in Macbeth.
2. The moral teaching of Silas Marner.
3. The death of Sir Roger.
4. The outline of Burke's Speech.
5. The historical situation at the time Burke's Speech was given.

ELEMENTARY FRENCH. (One hour and a half.)

A. Where and how long have you studied French? How many periods per week? What books have you used?

I.

(Translation must be close, but clear and idiomatic English is required.)

Translate:—

"Un jeune seigneur heureusement né n'est ni peintre, ni musicien, ni architecte, ni sculpteur; mais il fait fleurir tous ces arts en les encourageant par sa magnificence: il vaut sans doute mieux les protéger que de les exercer. Il suffit que M. le marquis ait du goût; c'est aux artistes à travailler pour lui; et c'est en quoi on a très grand raison de dire que les gens de qualité (j'entends ceux qui sont très riches) savent tout sans avoir rien appris, parce qu'en effet, ils savent, à la langue, juger de toutes les choses qu'ils commandent et qu'ils paient."

II.

Je suivis la foule, mais ce n'était qu'une fausse sortie. J'avais laissé mon chapeau dans une encoignure,—un chapeau haut de forme qui m'avait considérablement gêné pendant toute la soirée. Je rentrai sous prétexte de le reprendre et, comme j'étais un peu de la maison, les domestiques ne se méfièrent pas de moi. D'ailleurs ils étaient occupés à transporter à l'office la vaisselle et les verres qui avaient servi aux soupeurs, et à un certain moment, je me trouvai seul près du buffet. Il n'y avait pas une minute à perdre. Après un furtif coup d'oeil à droite et à gauche, je m'approchai de la corbeille, je fis rouler prestement deux pêches dans mon chapeau, puis je quittai la salle à manger.

III.

L'excessive pesanteur de cet homme dans la destinée humaine troublait l'equilibre. Cet individu comptait à lui seul plus que le groupe universal. Ces pléthores de toute la vitalité humaine concentrés dans une seule tête, le monde montant au cerveau d'un homme, cela serait mortel à la civilisation, si cela durait. Le moment ètait venu pour l'incorruptible équité suprême d'aviser. Probablement les principes et les éléments, d'ou dépendent les gravitations régulières dans l'ordre morale comme dans l'ordre matériel, se plaignaient. Le sang qui fume, le trop-plein des cimetières, les mères en larmes, ce sont des plaidoyers redoutables.

IV.

Prin, parts;—1) aller; 2) vaincre; 3) s'asseoir; 4) venir; 5) recevoir; 6) voir; 7) mettre; 8) écrire; 9) vouloir; 10) pouvoir.

Translate:—

V.

1. It is time to get up now.
2. Our country cousins have been at our house for four days.
3. We are going to visit our friends in the country.
4. Today it is hot.
5. Have you any books? I have none.
6. Give me some.
7. It is the twentieth of June, nineteen hundred and six.
8. What time is it? It is two o'clock.
9. With whom are you going to Boston?
10. My watch is prettier than the one you have.

ELEMENTARY GERMAN. (One and one-half hours.)

A. Where and how long have you studied German? What text books did you use?

I.

The translation must be close; but clear and idiomatic English is required.

Translate:—

Herr Philipp Simonis war ein entfernter Vetter meines Vaters und damals, als ich ihn kennen lernte, ein Mann von etwa fünfundfünfzig Jahren. Er hatte Theologie und Philologie studiert und war dann als Hofmeister eines reichen jungen Grafen nochmals mit diesem auf die Universität gezogen und später auf Reisen mit ihm weit in der Welt herumgekommen. Der zu allen brauchbare Mann hatte dann auf längere Zeit einen sehr gut dotierten Vertrauensposten als Sekretär des jungen Grafen eingenommen und sich im Laufe der Zeit durch Sparsamkeit ein kleines Vermögen erworben. Als er durch den Tod seines früheren Zöglings diesen Posten verlor, kam er zu meinen Eltern nach Steinhusen auf Besuch. An diesem Orte gefiel es ihm wohl, und er wurde bald mit so vielen Fäden an ihm geknüpft, dass er dort hängen blieb.

II.

Seit wir in die heisse Zone eingetreten waren, konnten wir jede Nacht die Schönheit des südlichen Himmels nicht genugsan bewundern, welcher in dem Masse, als wir nach Süden vorrückten, neue Sternbilder vor unsern Augen entfaltete. Man hat ein wunderbar bekanntes Gefühl, wenn man bei der Annäherung gegen den Aquator, und besonders wenn man von der einen Hemisphere in die andere übergeht, allmählich die Sterne niederer werden und zuletzt verschwinden sieht, welche man von seiner ersten Kindheit an kennt.

III.

Er setzte sich hin, um zu arbeiten, aber er hatte keine Gedanken. Nachdem er es eine Stunde lang vergebens versucht hatte, ging er ins Familienzimmer hinab. Es war niemand da, nur kühle grüne Dämmerung; auf Elisa-

beths Nähtisch lag ein rotes Band, das sie am Nachmittag um den Hals getragen hatte. Er nahm es in die Hand, aber es that ihm weh, und er legte es wieder hin. Er hatte keine Ruhe, er ging an den See hinab und band den Kahn los; er ruderte hinüber und ging noch einmal alle Wege, die er kurz vorher mit Elisabeth zusammen gegangen war.

IV.

Prin parts:—1) laufen; 2) fahren; 3) gehen; 4) helfen; 5) gelingen; 6) ziehen; 7) schneiden; 8) vergessen; 9) sein; 10) tun.

Inflect:—1) Present of geben; 2) imperfect of sehen; 3) perfect of sein.

VI.

Translate:—

1. Today is the fourteenth of June, nineteen hundred and six.
2. In summer the days are longer than in winter.
3. A week ago I was at home.
4. The boy drank two glasses of milk.
5. What time is it? It is half past nine.
6. I should like to go.
7. She is said to be very old.
8. I shall write to you as soon as you will let me know where you live.
9. When it struck four o'clock, he stepped into the house.
10. He went fishing.

ELEMENTARY LATIN. (2 hours.)

A. Where and how long have you studied Latin? What text books did you use?

I.

(The translation should be close; but clear and idiomatic English is required.)

Translate:—

(Labienus sends the tenth legion as a relief to the Romans).

Caesar, cum septimam legionem, quae juxta constiterat, item urgeri ab hoste vidisset, tribunos militum monuit, ut paulatim sese legiones conjungerent et conversa signa in hostes inferrent. Quo facto cum alius alii subsidium ferret, neque timerent, ne aversi ab hoste circumvenirentur, audacius resistere ac fortius pugnare coeperunt. Interim milites legionum duarum, quae in novissimo agmine praesidio impedimentis fuerant, proelio muntiato cursu incitato in summo colle ab hostibus conspiciebantur, et T. Labienus, castris hostium potitus et ex loco superiore, quae res in nostris castris gererentur, conspicatus deciman legionem subsidio nostris misit. (Caesar's Gallic War II. 26.)

II.

1. In I explain fully *vidisset.*
2. Explain fully *conjungerent* in I.
3. Explain fully *quo* in I.
4. Prin. parts; (a) constiterat; (b) vidisset; (c) facto; (d) ferret; (e) misit.
5. Decline in singular and plural; (a) militum; (b) alius; (c) res.

III.

(At sight)

Atque cum Caesar eo die in senatum venisset, absidentem conjurati specie effici circumsteterunt ilicoque unus, quasi aliquid rogaturus, propius accessit renuentique ab utroque umero togam apprehendit. Deinde clamantem, "Ista quidem vis est," Casca, unus e conjuratis, adversum volnerat paulum infra jugulum.

ADVANCED LATIN. (2 hours).

A. Where and how long have you studied Latin? What books have you used?

I.

(The translation should be close; but clear and idiomatic English is required.)

(Aeneas warned to flee)

Ut primum alatis tetigit magalia plantis.
Aeneam fundantem arces ac tecta novantem
Conspicit; atque illi stellatus jaspide fulva
Ensis erat, Tyrioque ardebat murice laena
Demissa ex umeris, dives quae munera Dido
Fecerat, et tenui telas discreverat auro.
Continuo invadit: 'Tu nunc Karthaginis altae
Fundamenta locas, pulchramque uxorius urbem
Extruis, heu regni rerumque oblite tuarum?

Virgil IV—258—267.

II.

Diffugimus visu exsangues; illi agmine certo
Laocoonta petunt; et primum parva duorum
Corpora natorum serpens amplexus uterque
Implicat, et miseros morsu depascitur artus;
Post ipsum auxilio subeuntem ac tela ferentem
Corripiunt, spirisque ligant ingentibus; et jam
Bis medium amplexi, bis collo squamea circum
Terga dati, superant capite et servicibus altis.

Virgil II—212—220.

III.

Write about five characters (five lines each) in Virgil.

IV.

(The conspiracy now thwarted)

Nunc quoniam, Quirites, consceleratissimi periculosissimique belli nefarios duces captos jam et comprehensos tenetis, existimare debetis omnis Catilinae copias, omnis spes atque

opes, his depulsis urbis periculis, concidisse. Quem quidem ego cum ex urbe pellebam, hoc providebam animo, Quirities, —remoto Catilina, non mihi esse P. Lentuli somnum, nec L. Cassi adipes, nec C. Cethegi furiosam temeritatem pertimescendam. (Cicero, Third Oration against Catiline VII. 16.)

HISTORY I. (American.)

A.

Give account of collateral reading.

B.

1. Give an outline of the life of Columbus, including (a) the question of his knowledge of previous discoveries, (b) the reasons for wishing to discover a new route, (c) the history of his attempts and failures before getting ships, (d) an account of each of his voyages and the discoveries made.

2. Give an account of the discoveries and explorations of (a) Cartier, (b) De Soto, (c) Ponce de Leon, (d) Balboa, (e) Magellan.

3. Give some account of each of the following and state the part taken by each in the history of the country, (a) Roger Williams, (b) Lord Baltimore, (c) LaSalle.

4. Give (a) the history of the New England Confederation, (b) an outline of the wars with the French 1689-1748.

5. Give an account of Burgoyne's expedition. Give an account of the political results that followed the latter.

6. When and for how long was Washington president? Give an account of political parties of that time. Give an account of the life work of Alexander Hamilton.

7. Give an account of the X. Y. Z. papers. Give an account of the Alien and Sedition Laws.

8. Give some account of each of the following,—(a) Erie Canal, (b) Missouri Compromise, (c) Monroe Doctrine, (d) war with Tripoli, (e) Aaron Burr.

HISTORY I. (American.)

9. Give a brief account of the principal historical events connected with each of the following,—(a) Major Anderson, (b) Merrimac (ship), (c) Vicksburg, (d) Gettysburg, (e) Bull Run.

10 Congress consists of what branches? Constitutional provisions for the election of the members of each branch? Elected for how long? Qualifications? Vacancies how filled?

11. Fully state the constitutional provisions for the elections of President and Vice-President.

HISTORY.

2. Ancient History.

1. (a) Name three important islands or groups of islands in the Aegean Sea. (b) Name the important island near the eastern coast of Greece. (c) Name some important island near the western coast of Greece. (d-e) Name the historically important island midway between Greece and Egypt. Give a brief account of the important traditions and the early history of that island.

2. Give a brief account of the history and the influence of the Delphian oracle. (b) Describe the three classes of people in Sparta. (c-d) Give a description of the government of Sparta. (e) What was the myth of Lycurgus?

3. The Persian Invasion: (a) Give brief account of principal expedition sent by Darius; (b-c) Give brief accounts of the four important battles resulting from the invasion of Xerxes; (d-e) Give an outline of collateral reading on the Persian Invasion.

4. Give outlines of life and public services of each of the following: (a) Pericles; (b) Alcibiades; (c) Socrates; (d) Xenophon; (e) Epamimondas.

5. (a) Describe the causes in Rome leading to the establishment of the tribunate. (b-c) Give the history and character of the laws of the twelve tables. (d) Give an

account of the war with the Greeks (Pyrrhus). (e) State the general fact about Roman road making.

6. (a-c) Give brief outlines of the three wars between Rome and Carthage. (d) Explain the Roman provincial system. (e) Give brief accounts of Marius and Sulla.

7. Give some account of five books used for collateral reading in Ancient History.

Note. Students who have given two full years to the study of Ancient History and have passed this examination, can make a special arrangement in regard to an additional examination which will give them the credit of an additional unit. See Catalog.

HISTORY.

3. English History.

1. Draw an outline map, or outline maps of the British Isles showing (a) The most important physical features; (b) The wall of Hadrian; (c) The wall of Antonine; (d) The seven kingdoms; (e) The situation of five important cities.

2. Give brief accounts of (a) The Roman conquest of Britain; (b) the character of the Roman influence; (c) results of the Roman withdrawal; (d) remains of Roman occupation; (e) account of three books treating of the Romans in Britain.

3. (a) Describe the early Germans. (b) Give brief account of the Anglo-Saxon Conquest. (c) Give brief account of the Danish conquest. (d) Give brief account of the Norman conquest. (e) Give an account of the poem of Beowulf.

4. (a-c) Give a brief account of the religious changes made by Henry VIII, Mary Tudor and Elizabeth. (d) Give some account of the literature of the time of Elizabeth. (e) Give some account of agriculture and the manufactures under the Tudors.

5. (a-b) Give a brief but comprehensive account of Magna Charta. (c) State the substance of the Petition of

Right. (d) State the substance of the Habeas Corpus Act. (e) State the substance of the Bill of Rights.

6. (a) Give a brief account of the Reform Bill of 1832. (b) Explain what the corn laws were. (c) Give in order with approximate dates the Hanoverian rulers. (d) Give an explanation of the power of parliament and the methods of controlling Parliament. (e) In a few sentences give some account of three books of value in explaining the England of the nineteenth century.

HISTORY.

4. Mediaeval and Modern History.

1. (a) Give some account of the personal characteristics of Charlemagne. (b) Mention some special authority on the life of Charlemagne. Name three books treating of the period of Charlemagne. (c) Give a brief account of his wars with the Saxons and Lombards. (d) Draw map showing the partition of Verdun. (e) What were the general characteristics of the descendants of Charlemagne?

2. (a-b) Give an explanation of the terms benefice, lord, vassal and subvassal; and the relations of feudalism. (c) Explain the importance of feudalism from a military and social point of view. (d) Give some reasons for feudalism. Name the nations that best illustrated its characteristics. (e) Name three books which give some account of feudalism.

3. (a) Explain the reasons for the Crusades:—(b) Give a brief account of third Crusade; (c) Give a brief account of fourth Crusade; (d) Give some account of the three religious-military orders; (e) Name three books treating of the Crusades.

4. (a) Give a brief account of principal causes of the Thirty Years' War. (b) Give brief account of the Bohemian election; (c) Of the end of Danish period; (d) Give a brief account of the last campaign of Gustavus Adolphus; (e) Give an account of the Peace of Westphalia.

5. Explain the territorial settlement of Europe made by the Congress of Vienna. (b) Explain the influence of Czar Alexander in regard to The Holy Alliance. (c) Give an account of the July Revolution in Paris, 1830. (d) Give an account of the February Revolution in Paris, 1848. (e) Explain how the Third Republic was established in France.

6. (a) Give a brief account of the Crimean War. (b) State the causes of the Russo-Turkish War of 1877-78. (c) Explain the work done by Congress of Berlin, 1878. (d) Draw map showing states of south-eastern Europe after 1878. (e) Give some account of three books dealing with parts of questions 5 and 6.

PHYSICAL GEOGRAPHY.

1. State the causes of the variations in season, climate, day and night.

2. What are ocean currents? How are they caused? Trace two important currents and state the influences exerted by each upon climate and civilization.

3. What are tides? How are they caused? Give causes for the variations in tidal height.

4. What is meant by erosion? How is it accomplished and what changes does it make in the topography of a country?

5. Discuss the glacial period and the results produced by it.

6. State briefly in what region active volcanoes are to be found. Give an explanation of volcanic eruptions. What are geysers? Locate two famous geyser regions.

7. Discuss trade winds and anti-trade winds.

ZOOLOGY.

1. Describe the structure and mode of growth of Amoeba. To what class does Amoeba belong? How does this class differ from others.

2. Describe the structure and method of use of the apparatus by which the clam respires.

3. To what class does the clam belong? What other animals belong to this class? How do they differ from the clam?

4. To what class does the earthworm belong? How does this class differ from others?

5. Describe the internal structure of the earthworm.

6. Define an insect. How does an insect differ from the crayfish or lobster, from a spider, from a myriapod?

7. Name the different orders of insects and give common examples of each.

8. Contrast the life history of a butterfly and grasshopper, naming the stages in the life of each.

9. What distinguishes the vertebrate animals from all others. Name and define as best you can the different orders of vertebrates.

10. Describe the circulatory system of a mammal.

PHYSICS.

1. Define: Mechanics, inertia, elasticity, acceleration, kinetic energy, and absolute density of a solid. Why does a flywheel help to steady the motion of running machinery? Two forces at right angles to each other,—one constant, the other variable, are acting on the same body. Show by a sketch the form of path traversed by the body in motion.

Describe the different kinds of equilibrium. How do you account for the fact that a rain drop may be seen while falling even though it has fallen from a cloud a mile or two high? Name the simple machines. State Archimede's Principle. State the laws of hydrostatic pressure. Explain the siphon.

2. Define: Sound,—an echo, overtones, and interference. Distinguish between noise and music. When a wind blows over a field of grain (or grass) a series of waves is set up. Describe the motion of the waves and the heads of grain. What are the effects of resonance? In what way may strings

be set in vibration, and upon what will the character of the tone emitted depend?

3. What is the kinetic (or dynamic) theory of heat? Distinguish between temperature and quantity of heat. Name some of the sources of heat, and the methods of transmitting heat. What are the effects of heat? What is meant by the latent heat of fusion—of vaporization? State the method used by Joule for determining the "Mechanical Equivalent of Heat."

4. Define: A luminous body, a shadow, a mirror, diffused reflection, a prism, and dispersion of light. How do you account for the sun being seen when it is really below the horizon? Assume an object—first in front of a concave mirror and secondly in front of a convex—(plano)—lens. Construct the image for the assumed object. What is meant by the visible spectrum?

5. What is meant by a magnetic field,—a permanent magnet, and by static electricity? What is meant by "local action" in a voltaic cell? How may it be remedied? What are the effects of an electric current? Describe the method of charging a conductor by induction. How do you account for the clouds being charged with electricity? Why can a greater current be obtained from a storage cell than from a primary cell? What is meant by the ohm, the volt, and the ampere?

GEOLOGY.

1. Describe the destructive and constructive action of glaciers.

2. Describe the influence of rivers in the formation and destruction of land and the laws governing same.

3. Describe the influence of animal and plant life in the formation of soil and rock.

4. What is a *fault?* A *fold?* A *joint?*

5. What is a fossil? Of what value are they geologically? What classes of fossils are most common?

6 and 7. Name the different geological periods in the formation of the earth's crust and name the plant and animal life characteristic of each.

8. In what age was coal formed? Describe the origin and formation of coal.

9. Describe the action and formation of volcanoes. Where are they mostly found?

10. Define Geology. Name the different branches or divisions of geology, characterizing each.

CHEMISTRY.

1. Give the formula for the following substances: Aluminum Hydroxide, Potassium chlorate, nitrous oxide, nitric oxide, mercurous chloride, zinc white, blue vitrol, plaster of Paris.

2. Complete the following reactions:

$Zn + H_2SO_4$	=	$MnO_2 + HCl$	=
$HNO_3 + Ca(OH)_2$	=	$Na_2CO + Ca(OH)_2$	=
$HCl + NH_4OH$	=	$KClO + MnO_2$	=
$H_2SO_4 + KOH$	=	$NH_4Cl + KNO_2$	=
$NH_4Cl + Ca(OH)_2$	=	$NaCl + H_2SO_4$	=

3. What is a salt? State how salts derive their names.

4. Upon what two laws is the atomic theory based? State them.

5. What is meant by neutralization? Give your answer in terms of the dissociation (ionization) theory.

6. Give the method of preparation and properties of chlorine.

7. Give the method of preparation and properties of hydrogen.

8. How many grams and how many liters of ammonia can be made from 53.4 gms. of ammonium chloride N=14, H=1, Cl=35.4?

9. Enumerate some of the chief commercial compounds of sodium and write all you know about one of them.

10. What are the chief chemical and physical distinctions between cast iron, wrought iron and steel?

SPECIMEN ENTRANCE EXAMINATION FOR TWO-YEAR STUDENTS.

GEOGRAPHY.

1. Name and locate the capitals of the following states: New York, Arkansas, California, Iowa, Ohio, South Carolina, New Jersey and Utah.

2. Name the six largest cities of the United States and tell where they are located.

3. Name the five largest rivers of the United States and tell where they rise and where they empty.

4. Where are the following mountains: Adirondack, Sierra Nevada, Ozark, Wahsatch, Alleghany, Green and Blue Ridge?

5. Bound the following states: Georgia, Washington, Illinois and Vermont.

6. Through what bodies of water would you pass in going by steamboat from Pittsburg to Chicago?

7. Describe the physical features of New England.

8. What is the area and population of New Hampshire?

9. In about what latitude and longitude is New Hampshire located.

10. Name the counties of New Hampshire and give their county seats.

ARITHMETIC.

1. Give tables for dry measure and square measure.

2. Multiply 18 and 2/3 by 4/15.

3. Divide 4.57683 by .0123.

4. How many tons of hay could be placed in a mow 14 feet square and 22 feet deep, assuming that a cubic foot of hay weighs 6 lbs?

5. What would be the cost of 2,660 lbs. of hay at $14 per ton?

6. How many apple trees could be set in a 6-acre orchard if the trees were placed 40 feet apart each way?

7. What would be the interest on $350 for 20 months at 6 per cent?

8. How many cords in a pile of cord wood 68 feet long and 6 feet high?

9. A bushel contains 2,150 cubic inches; how many bushels of oats could be placed in a bin 6 feet wide, 5 feet deep and 12 feet long?

10. How many tons of silage could be placed in a round silo 14 feet in diameter and 30 feet deep, assuming that a cubic foot of silage weighs 40 lbs.?

ENGLISH.

1. Write a complete letter in answer to an advertisement, asking for a position.

2. Write a careful description of the appearance of the town from which you have come.

3. Define and illustrate the parts of speech.

4. Illustrate the use of the different marks of punctuation. What is a verbal noun, an infinitive, a noun in apposition?

5. Write, in 100 words, the story of the last interesting book you have read.

HISTORY OF THE UNITED STATES.

1. *(a)* Give an account of the first settlement in Virginia. *(b)* Give an account of the first settlement in Massachusetts.

2. Give some account of the French and Indian War, including *(a)* causes, *(b)* campaign of 1755, *(c)* most important campaign, *(d)* political results that followed the war, *(e)* connection, if any, with American Revolution.

3. Name the presidents of the United States, stating approximately the years when each one was in office. Give the political party of each one and some one important fact concerning his administration.

4. What were the causes of the Spanish-American War? What were the results?

5. What is the meaning of "sixteen to one?" What political parties exist at present? What change is proposed in election of United States senators?
